Overview of restatements: published on 16 April 2024

Following the acquisition of Credit Suisse, we continue to refine our reporting structure and organizational setup to align with interests of stakeholders and further incentivize our business divisions to achieve Group-wide goals

		What are we doing?	Why are we doing it?	Impacts	
1	Perimeter shifts	We are transferring businesses from Credit Suisse's Swiss Bank to the business divisions in which clients can be best served	To support a more cohesive client experience and unlock efficiencies of added scale	Moving from P&C to GWM: ~72bn in Invested Assets ~600m in annualized underlying revenues	
		Predominantly relates to the high net-worth client segment moving to \ensuremath{GWM}		Expect over 200m uplift to GWM underlying PBT by 2026	
2	Group Treasury allocations	We are pushing out effectively all Group Treasury costs that have been historically retained and reported in Group Items.	To continue minimizing the scope of what is held centrally and ensure full alignment.	~300m of funding costs, moved from Group Items to business division in 2H23	
_		We will only retain in Group Items costs that are not controlled by the business divisions, including DTA funding costs and hedging and own debt	across revenues and costs associated with managing capital, liquidity, and funding	168bn of total assets, 9bn of RWA and 173bn of LRD shifted from Group Items to business division as of 31.12.23	
		Additionally, we have also aligned internal funds transfer pricing methodologies applied by CS entities to UBS's		Going forward we expect Group Items underlying PBT, excluding litigation and income	
		In parallel with the changes noted above, we increased the allocation of balance sheet resources from Group Treasury to the business divisions		from Group hedging and own debt, to average minus ~100m per quarter, which is a function o DTA balances and interest rates	
3	Non-core and Legacy cost allocations	We are reallocating select NCL costs to businesses where they are more appropriately aligned	To avoid stranded costs in NCL at the end of the integration process	~300m annualized reduction in NCL underlying costs	
4	Equity attribution framework	We are updating the equity attribution framework to align the capital ratios for RWA and LRD more closely with our current Group capital targets, increasing the equity attributed to the business divisions	To continue minimizing the scope of what is held centrally	~14bn of equity that was previously retained in Group Items is now within the Business Divisions ¹
