Caution regarding forward looking statements

This presentation contains statements that constitute “forward-looking statements”, including but not limited to statements relating to the risks arising from the current market crisis and other risks specific to UBS's business, strategic initiatives, future business development and economic performance. While these forward-looking statements represent UBS's judgments and expectations concerning the development of its business, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from UBS's expectations. These factors include, but are not limited to: (1) the extent and nature of future developments in the United States mortgage market and in other market segments that have been or may be affected by the current market crisis; (2) other market and macro-economic developments, including movements in local and international securities markets, credit spreads, currency exchange rates and interest rates; (3) changes in internal risk control and limitations in the effectiveness of UBS's internal processes for risk management, risk control, measurement and modeling, and of financial models generally; (4) the degree to which UBS is successful in implementing its remediation plans and strategic and organizational changes, and whether those plan and changes will have the effects anticipated; (5) developments relating to UBS's access to capital and funding, including any changes in UBS's credit spreads and ratings; (6) changes in the financial position or creditworthiness of UBS's customers, obligors and counterparties, and developments in the markets in which they operate; (7) management changes and changes to the structure of UBS's Business Groups; (8) the occurrence of operational failures, such as fraud, unauthorized trading and systems failures; (9) legislative, governmental and regulatory developments, including the possible imposition of more stringent capital requirements and of direct or indirect regulatory constraints on US's activities; (10) the possible consequences of ongoing governmental investigations of certain of UBS's past business activities; (11) competitive pressures; (12) technological developments; and (13) the impact of all such future developments on positions held by UBS, on its short-term and longer-term earnings, on the cost and availability of funding and on UBS's capital ratios.

In addition, these results could depend on other factors that we have previously indicated could adversely affect our business and financial performance which are contained in other parts of this document and in our past and future filings and reports, including those filed with the SEC. More detailed information about those factors is set forth elsewhere in documents furnished by UBS and filings made by UBS with the SEC, including UBS's Annual Report on Form 20-F for the year ended 31 December 2007. UBS is not under any obligation to (and expressly disclaims any such obligation to) update or alter its forward-looking statements, whether as a result of new information, future events, or otherwise.

Investment Bank revenues

Investment banking (CHF m)

- ◆ Declining fee pools and reduced market activity compared with a record 2Q07
- ◆ Improved ECM, continued strength in DCM and recovery in M&A advisory compared to 1Q08
- ◆ Market share gains; #4 in Dealogic (vs. #5 in 1Q08)

Sales & Trading – Equities (CHF m)

- ◆ Down YoY and QoQ due to market turbulence and slower derivatives activity
- ◆ Continued strength in cash and a strong result in prime brokerage

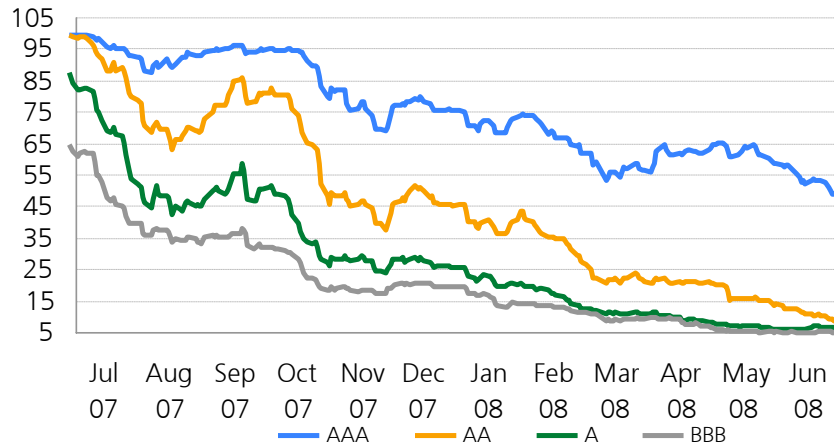

Sales & Trading – FICC (CHF m)

- ◆ 2Q losses on legacy risk positions of USD 5.1 bn
- ◆ Positive result in core businesses, with good performance in FX & MM, strength in Structured Products and YoY growth in Rates

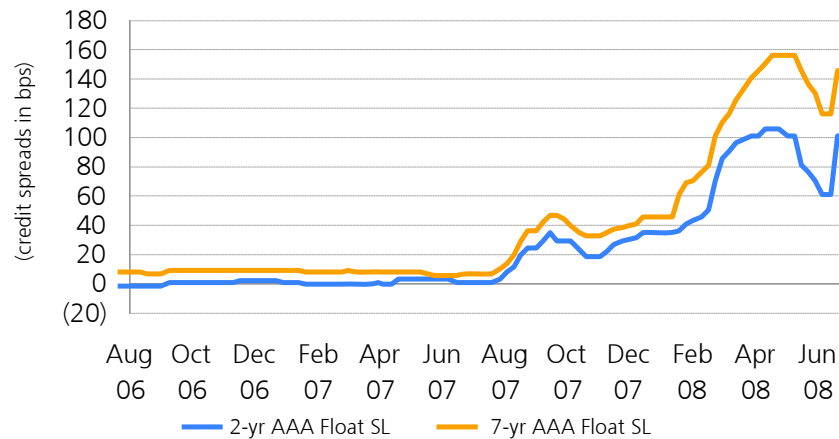

Key development in credit markets

ABX 07-01 AAA to BBB (price in%)

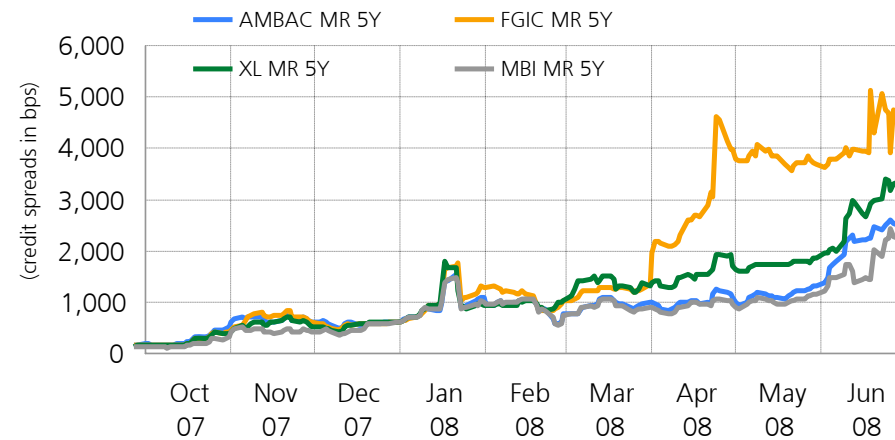

- ◆ Further deterioration in most of the ABX indices
- ◆ Widening credit spreads in the student loan paper market
- ◆ Sharp increase in credit spreads of monolines

Student Loans

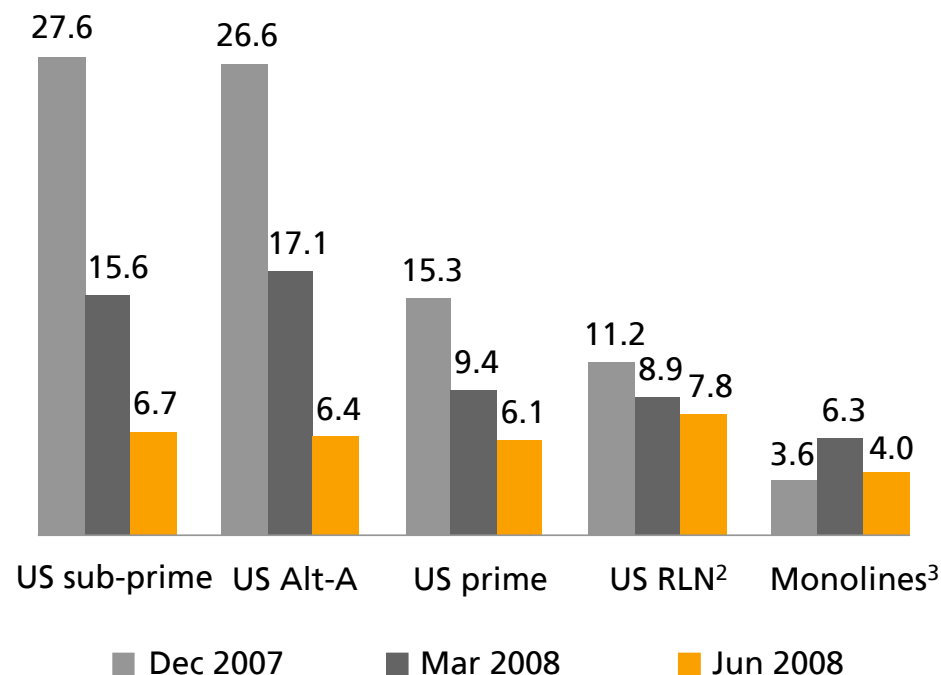

Monoline insurers

Note: The indices and price movements in the charts above are presented for illustrative purposes only and should not be interpreted as an indication that they necessarily were or can be used in determining the market value of any securities owned by UBS, or that the value of any portion of UBS's portfolio will necessarily move in accordance with these indices or prices.

US residential mortgage related positions

Net exposures¹ (USD bn)

◆ All net exposures significantly reduced

◆ 2Q P&L impact of USD 4.8 bn:

US Sub-prime	(0.8)
US Alt-A	(0.6)
US prime	(0.0)
US RLN ²	(0.5)
Monolines ³	(2.9)

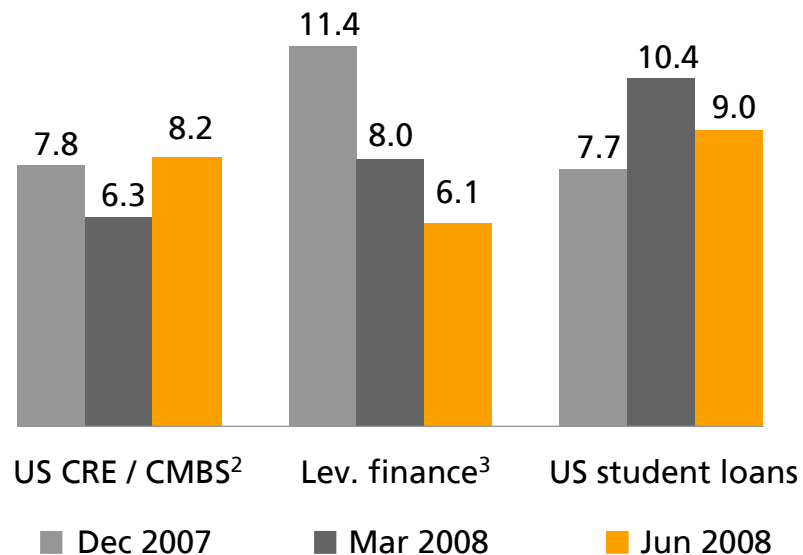

¹ Net exposure represents market value of gross exposure net of short positions and hedges considered effective.

² US RLN exposure has been excluded from the other asset categories.

³ P&L represents change in credit valuation adjustments during the quarter; Exposures represent current replacement value of credit protection bought from monoline insurers against specific assets held by UBS, after credit valuation adjustments; in one instance, credit protection was bought from a monoline insurer that has defaulted on its obligation to UBS and these hedges are now considered ineffective.

Other risk positions

Net exposures¹ (USD bn)

◆ 2Q P&L impact of USD 0.4 bn:

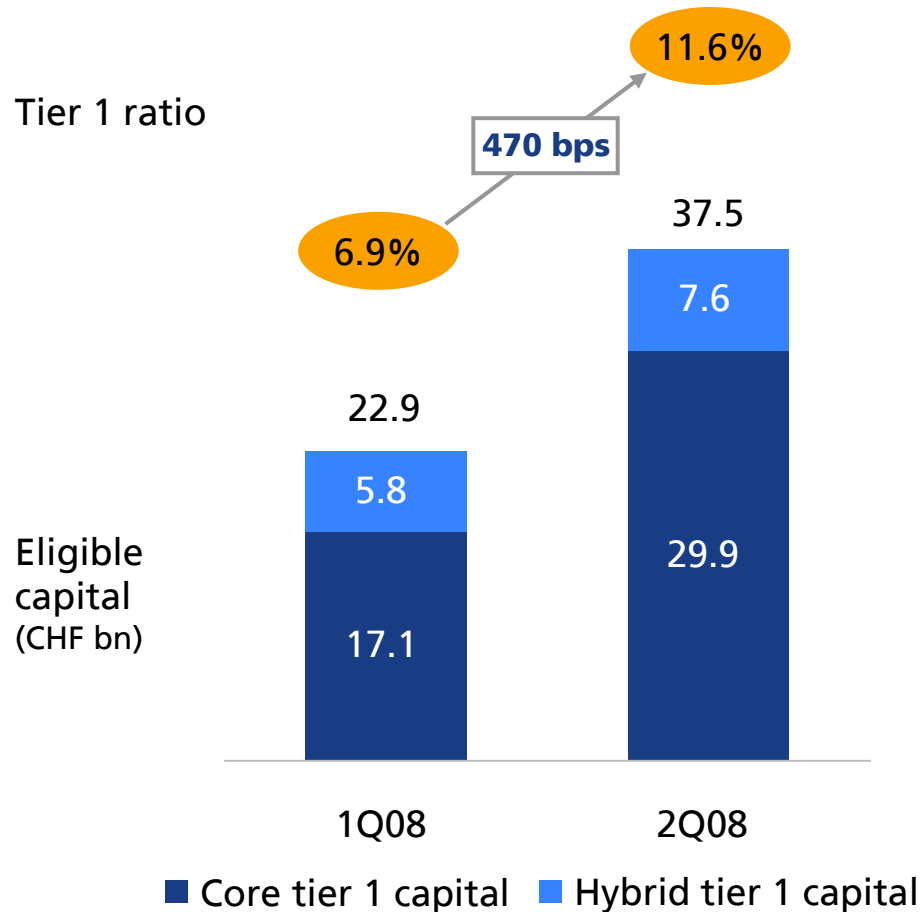

US CRE / CMBS ²	0.3
Leveraged finance ³	(0.2)
US student loans	(0.5)

1 Net exposure represents market value of gross exposure net of short positions and hedges considered effective

2 In second quarter, inaccuracies in the treatment of certain derivative trading positions were corrected in order to better represent the risk from these positions. Had similar adjustments been made in the prior period, US commercial real estate net exposure would have been USD 7.7 billion at the end of first quarter.

3 Net exposure represents the notional commitment amount less gross markdowns and effective hedges. Net exposures reported in first quarter represented net exposures based on notional commitment amounts less effective hedges.

Capital management

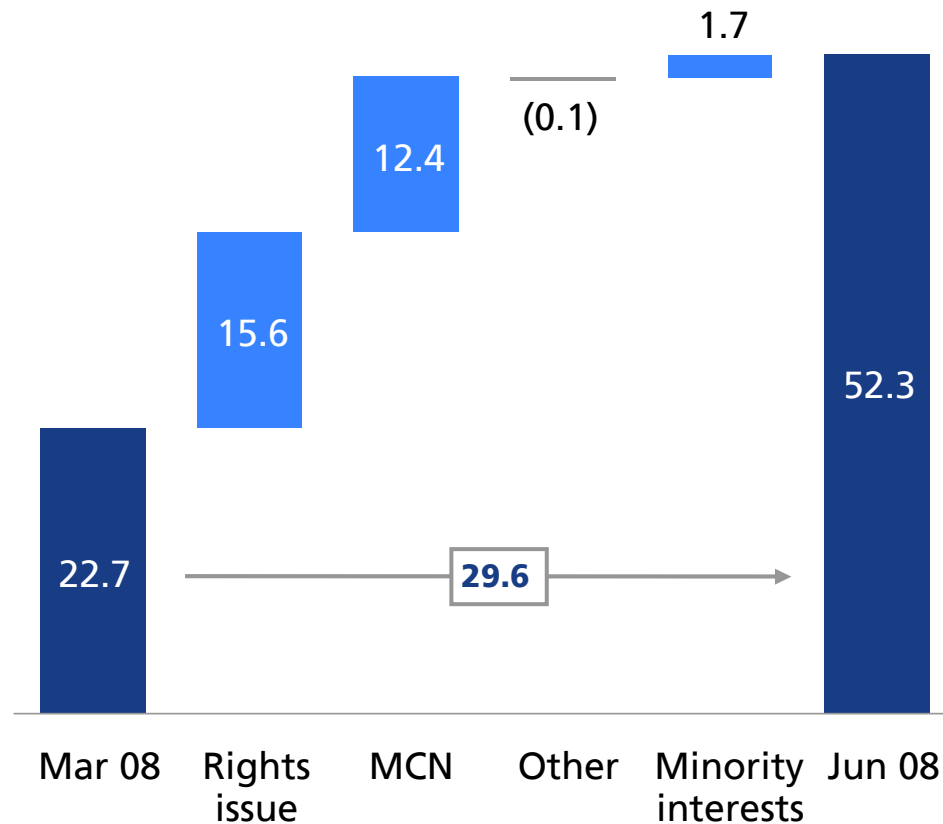

- ◆ Very strong Tier 1 and total capital ratios at 11.6% and 15.7%
- ◆ Tier 1 capital increased on rights and hybrid issuance and RWA reduction
- ◆ RWA reduction mostly in Investment Bank

Total equity development

Total equity (CHF bn)

- ◆ Rights issue added CHF 15.6 bn to equity
- ◆ MCN reclassified from liability to equity instruments and added CHF 12.4 bn to equity
- ◆ Minority interests increased by CHF 1.7 bn on hybrid issuance

Total	6.3	0.3	1.6	8.2

1 Net exposure represents market value of gross exposure net of short positions and hedges considered effective

2 Includes additions, disposals, amortizations and adjustments to hedges

3 At 30 June 2008, the market value of the gross exposure was USD 0.7 billion for super senior CMBS CDOs (excludes positions hedged with monoline insurers where hedges are considered effective), USD 13.4 billion for CMBS/CMBX trading positions and USD 2.9 billion for US commercial real estate loans

4 In second quarter, inaccuracies in the treatment of certain derivative trading positions were corrected in order to better represent the risk from these positions. Had similar adjustments been made in the prior period, net exposure would have increased from USD 2.4 billion to USD 3.8 billion at the end of first quarter. As a result, total commercial real estate exposure at 31.03.2008 would have increased from USD 6.3 billion to USD 7.7 billion. On the same basis gross long positions in CMBS and CMBX trading positions actually decreased by approximately USD 1.6 billion over the second quarter 2008 to USD 13.4 billion.

5 Includes net exposures of USD 397 million from equity investments

Total	8.0	6.1	90

1 A leveraged finance deal is defined based on an internal rating which equals to a corporate credit rating of BB- or worse at the point of commitment.

2 The net exposure of a leveraged finance commitment represents the commitment amount less gross markdowns and effective hedges.

3 Exposures reported in first quarter 2008 represented notional commitment amounts less effective hedges. On 31.03.2008 the reported amounts were USD 3.6 billion for old deals and USD 5.0 billion for new deals.

4 The average mark represents the ratio between net exposure and the notional commitment amount less effective hedges
