PACE Select Advisors Trust offers multiple share classes representing interests in 15 separate Portfolios. (UBS Government Money Market Investments Fund offers only one share class.) Different classes of shares and/or Portfolios are offered by separate prospectuses.

For more information on a portfolio or class of shares, contact your financial advisor. He or she can send you a current prospectus relating to a portfolio or class of shares. Investors should carefully read and consider a mutual fund's investment objectives, risks, charges, and expenses before investing. The prospectus contains this and other information about a mutual fund. For a current prospectus, contact UBS Asset Management (US) Inc. at 888-793 8637, or visit us on the Web at www.ubs.com/am-us.

Derivatives vary in complexity, involve risks which are different from, and may be greater than, the risks associated with investing in securities or other instruments. Please see the funds' prospectuses for more complete discussion of the risks associated with investing in derivatives.

Introduction

March 4, 2024

Dear PACE Shareholder,

We are pleased to provide you with the semiannual report for the PACE portfolios (the "Portfolios"), comprising the PACE Select Advisors Trust. This report includes summaries of the performance of each Portfolio, as well as commentaries from the investment advisor and subadvisors regarding the events that affected Portfolio performance during the six-months ended January 31, 2024 (the "reporting period"). Please note that the opinions of the subadvisors do not necessarily represent those of UBS Asset Management (Americas) LLC.

The global economy continues to expand

Despite several headwinds, the global economy was resilient and continued to expand during the reporting period. In its January 2024 *World Economic Outlook Update*, the International Monetary Fund (the "IMF") modestly increased its growth projections versus its update in October 2023. This was due to "greater-than-expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China." According to the IMF, 2024 GDP growth in the US is expected to be 2.1% (versus 2.5% in 2023), 0.9% in the eurozone (versus 0.5% in 2023), 0.6% in the UK (versus 0.5% in 2023), and 0.9% in Japan (versus 1.9% in 2023).

A significant factor impacting the global economy and the financial markets was central bank monetary policy. In July 2023, the US Federal Reserve (the "Fed") raised interest rates to a range between 5.25% and 5.50%, a 22-year high. With inflation continuing to moderate, the Fed then remained on hold from September through December 2023. Then in December, the Fed "pivoted," as it indicated the likely end to rate hikes and penciled in three rate cuts in 2023. However, at its meeting in January 2024 the Fed held rates steady, saying it does "...not expect it will be appropriate to reduce the target range until it has gained greater confidence that inflation is moving sustainably toward 2 percent." The European Central Bank (ECB) and the Bank of England (BoE) also appeared to pivot and indicated that rates cuts were possible in 2024. One outlier was the Bank of Japan, as it maintained its accommodative monetary stance.

Global equities generally rally

Global equities produced weak results over the first three months of the reporting period, as investors were concerned that interest rates would remain "higher for longer" and potentially drag the economy into a recession. Equities than ended on a positive note, as they rallied over the last three months of the reporting period. Central bank pivots were a major factor in the market's turnaround. Signs that the Fed may orchestrate a "soft landing" for the economy also supported the market. For the six-months ended January 31, 2024, the S&P 500 Index¹ returned 6.43%. Outside the US, international developed equities, as measured by the MSCI EAFE Index (net),² gained 3.15%. One outlier was weakness from emerging market equities, as they returned -6.00% during the period, as measured by the MSCI Emerging Markets Index (net)³.

- ¹ The S&P 500 Index is an unmanaged, weighted index composed of 500 widely held common stocks varying in composition and is not available for direct investment. Investors should note that indices do not reflect the deduction of fees and expenses.
- ² The MSCI EAFE Index (net) is an index of stocks designed to measure the investment returns of developed economies outside of North America. Net total return indices reinvest dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The index is constructed and managed with a view to being fully investable from the perspective of international institutional investors. Investors should note that indices do not reflect the deduction of fees and expenses.
- ³ The MSCI Emerging Markets Index (net) is a market capitalization-weighted index composed of different emerging market countries in Europe, Latin America, and the Pacific Basin. Net total return indices reinvest dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The index is constructed and managed with a view to being fully investable from the perspective of international institutional investors. Investors should note that indices do not reflect the deduction of fees and expenses.

The overall fixed income market edges higher

As was the case with equities, the overall global fixed income market was initially weak and then rallied. Central bank pivots were again the driver of the fixed income market's reversal of fortune. In the US, the yield on the 10-year Treasury briefly breached 5% in October 2023—the first time in 16 years—and then fell sharply, ending the reporting period at 3.99%. For the six-month reporting period, the overall US bond market, as measured by the Bloomberg US Aggregate Index,⁴ returned 3.15%. Riskier fixed income securities generated even better results. High yield bonds, as measured by the ICE BofAML US High Yield Index,⁵ gained 6.14%. Elsewhere, emerging markets debt, as measured by the J.P. Morgan Emerging Markets Bond Index Global (EMBI Global),⁶ rose 3.48% during the reporting period.

Sincerely,

Mark E. Carver

President, PACE Select Advisors Trust

Tu E (an

Executive Director, UBS Asset Management (Americas) LLC

This report is intended to assist investors in understanding how the Portfolios performed during the six-month period ended January 31, 2024. The views expressed in the Advisor's and Subadvisors' comments sections are as of the end of the reporting period, reflect performance results gross of fees and expenses, and are those of the investment advisor and subadvisors. Subadvisors' comments on Portfolios that have more than one subadvisor are reflective of their portion of the Portfolio only. The views and opinions in this report were current as of March 4, 2024. They are not guarantees of future performance or investment results and should not be taken as investment advice. Investment decisions reflect a variety of factors, and the investment advisor and subadvisors reserve the right to change their views about individual securities, sectors and markets at any time. As a result, the views expressed should not be relied upon as a forecast of a Portfolio's future investment intent.

⁴ The Bloomberg US Aggregate Index is an unmanaged broad based index designed to measure the US dollar-denominated, investment-grade, taxable bond market. The index includes bonds from the Treasury, government-related, corporate, mortgage-backed, asset-backed and commercial mortgage-backed sectors. Investors should note that indices do not reflect the deduction of fees and expenses.

⁵ The ICE BofAML US High Yield Index is an unmanaged index that tracks the performance of US dollar denominated, below investment-grade rated corporate debt publicly issued in the US domestic market.

⁶ The J.P. Morgan Emerging Markets Bond Index Global (EMBI Global) is an unmanaged index which is designed to track total returns for US dollar denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans and Eurobonds. Investors should note that indices do not reflect the deduction of fees and expenses.

UBS Government Money Market Investments Fund

Performance (unaudited)

The seven-day current yield for UBS Government Money Market Investments Fund (the "Fund" or "Portfolio") as of January 31, 2024 was 5.25% (after fee waivers/expense reimbursements).¹ For more information on the Fund's performance, refer to "Yields and characteristics at a glance" on page 6. Please remember that the PACE program fee is assessed outside the Portfolio at the PACE program account level. The program fee does not impact the determination of the Portfolio's net asset value per share. For a detailed commentary on the market environment in general during the period, please refer to page 3.

Advisor's Comments (unaudited)

We tactically adjusted the Fund's weighted average maturity ("WAM") throughout the six-month review period (Weighted average maturity is the average time until a portfolio's securities mature, weighted in proportion to the amount invested in the portfolio). When the reporting period began, the portfolio had a WAM of eight days. This was 43 days at the end of the reporting period.

A number of adjustments were made to the Fund's sector and issuer positioning during the six-month period. We increased the portfolio's exposure to US Treasury obligations. In contrast, we reduced its allocation to repurchase agreements and, to a lesser extent, US government agency obligations. (Repurchase agreements are transactions in which the seller of a security agrees to buy it back at a predetermined time and price or upon demand.)

PACE Select Advisors Trust – UBS Government Money Market Investments Fund

Investment Advisor:

UBS Asset Management (Americas) LLC

Portfolio Manager:

Robert Sabatino

Objective:

Current income consistent with preservation of capital and liquidity

Investment process:

The Portfolio is a money market mutual fund and seeks to maintain a stable price of \$1.00 per share, although it may be possible to lose money by investing in this Portfolio. The Portfolio invests in a diversified portfolio of high-quality money market instruments of governmental issuers and in related repurchase agreements. Security selection is based on the assessment of relative values and changes in market and economic conditions.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Fund's investments. In the event a Fund's holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets	Unadjusted quoted prices in active market for identical investments	Other significant observable inputs	Unobservable inputs	
Description	(Level 1)	(Level 2)	(Level 3)	Total
U.S. government agency obligations	\$—	\$ 303,500,162	\$	\$ 303,500,162
U.S. Treasury obligations	_	1,638,236,061	_	1,638,236,061
Repurchase agreements	_	1,053,368,000	_	1,053,368,000
Total	\$—	\$2,995,104,223	\$—	\$2,995,104,223

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- ¹ Floating or variable rate securities. The rates disclosed are as of January 31, 2024. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.
- ² Rates shown reflect yield at January 31, 2024.

See accompanying notes to financial statements.

PACE Mortgage-Backed Securities Fixed Income Investments

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 2.68% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Bloomberg US Mortgage Backed Securities Index (the "benchmark") returned 2.72%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 11. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Subadvisor's comments (unaudited)²

The portfolio and its benchmark generated positive returns during the reporting period. Security selection within agency mortgage-backed securities (MBS) and exposure to agency collateralized mortgage obligations (CMOs) detracted from performance, while exposure to residential nonagency mortgage-backed securities, collateralized loan obligations (CLOs), and mortgage pool options contributed to returns. Its interest rate strategies were positive for performance due to an overweight to the 3-year and 5-year portions of the US yield curve, as Treasury yields fell over the period.

Overall, derivative usage was negative for performance during the period. The use of interest rate swaps to manage US interest rate exposure and yield curve positioning contributed to performance, while the use of US Treasury options and futures detracted from returns. Mortgage pool options, used to manage interest rate and volatility risk within the sector, were positive for performance. The use of money market futures as a duration and cash management tool contributed to performance.

PACE Select Advisors Trust – PACE Mortgage-Backed Securities Fixed Income Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisor:

Pacific Investment
Management Company LLC
("PIMCO")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, David Kelly, Christopher Andersen, CFA, and Eileen Wong (since May 2023)

PIMCO: Daniel Hyman and Michael Cudzil

Objective:

Current income

Investment process:

The subadvisor utilizes a strategy that involves buying or selling specific bonds based on an analysis of their values relative to other similar bonds.

¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

one component of a balanced investment plan.

PACE Mortgage-Backed Securities Fixed Income Investments

Performance at a glance (unaudited)				
Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years
Before deducting maximum sales charge				
Class A ¹	2.45%	1.04%	(0.16)%	0.91%
Class Y ²	2.68	1.30	0.09	1.16
Class P ³	2.68	1.31	0.09	1.17
After deducting maximum sales charge				
Class A ¹	(1.43)	(2.73)	(0.93)	0.52
Bloomberg U.S. Mortgage Backed Securities Index ⁴	2.72	1.23	0.00	1.18

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.13% and 0.97%; Class Y—0.95% and 0.72%; and Class P—0.94% and 0.72%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—0.97%; Class Y—0.72%; and Class P—0.72%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 3.75%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Bloomberg US Mortgage-Backed Securities Index is an unmanaged index which primarily covers the mortgage-backed passthrough securities issued by Ginnie Mae (formally known as the Government National Mortgage Association or GNMA), Freddie Mac (formally known as Federal Home Loan Mortgage Corporation or FHLMC), and Fannie Mae (formally known as Federal National Mortgage Association or FNMA). Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets Description	Unadjusted quoted prices in active market for identical investments (Level 1)	Other significant observable inputs (Level 2)	Unobservable inputs (Level 3)	Total
Asset-backed securities	\$ —	\$ 17,307,489	\$ 118,413	\$ 17,425,902

At January 31, 2024, there were no transfers in or out of Level 3.

Securities valued using unobservable inputs, i.e. Level 3, were not considered significant to the Fund.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- ¹ Floating or variable rate securities. The rates disclosed are as of January 31, 2024. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.
- ² Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$17,957,129, represented 9.3% of the Portfolios net assets at period end.
- ³ Security fair valued by the Valuation Committee under the direction of the Board of Trustees.
- ⁴ Significant unobservable inputs were used in the valuation of this security; i.e. Level 3.
- ⁵ Zero coupon bond.
- ⁶ Security, or portion thereof, pledged as collateral for investments sold short, written options, futures and/or swap agreements.
- ⁷ Rates shown reflect yield at January 31, 2024.
- ⁸ Payments made or received are based on the notional amount.

See accompanying notes to financial statements.

PACE Intermediate Fixed Income Investments

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 4.72% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Bloomberg US Aggregate Bond Index (the "benchmark") returned 3.15%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 34. Please note that the returns shown do not reflect the deduction of taxes that a shareholder could pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Subadvisor's comments (unaudited)²

The Portfolio outperformed the benchmark during the reporting period. Our sector and ratings exposures had the largest impact on relative results, and the contribution was balanced across sectors. The Portfolio's emphases on stronger-performing sectors of the market that included high-yield corporate bonds, senior bank loans, asset-backed securities (ABS), investment-grade corporate bonds, and commercial mortgage-backed securities (CMBS) were additive to results. Security selection had a small but negative impact on results amid a broad-based credit rally. Yield curve impacts had a positive impact on returns due to small mismatches that arose during our practice of approximating the index's yield curve exposures during a period of volatile interest rates. A product of our bottom-up credit analysis and valuation framework approach was that the Portfolio had no mortgage-backed security (MBS) exposure despite its presence in the Index.

The Portfolio's current composition reflects careful selection of individual credits that still offer attractive valuations. The Portfolio is emphasizing corporate debt, ABS, and CMBS. 82% of the Portfolio is rated investment-grade, while 18% is rated high-yield; of the 18% rated high yield, 13% is BB-rated. The Portfolio is de-emphasizing U.S. Treasury instruments because of the credit opportunities identified and held. We believe the Portfolio's forward-looking yield is higher than can be attained through investments in index alternatives.

PACE Select Advisors Trust – PACE Intermediate Fixed Income Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisor:

Brown Brothers Harriman & Co. ("BBH")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, David Kelly, Christopher Andersen, CFA, and Eileen Wong (since May 2023)

BBH: Andrew Hofer, Neil Hohmann and Paul Kunz

Objective:

Current income, consistent with reasonable stability of principal

Investment process:

The subadvisor seeks to achieve the Portfolio's investment objective by investing in a well-diversified portfolio of fixed income instruments.

Treasury futures are used to manage interest rate exposures when it is more efficient to do so using futures instead of cash bonds. Treasury futures positions are utilized to add or reduce exposures along the yield curve to minimize active differences that arise from our bottom-up investment process. The Portfolio utilized longer maturity US Treasury bond futures contracts to gain exposures to longer duration interest rates, as our process led us away from longer duration credits due to unattractive valuations. The Portfolio also held positions in shorter maturity US bond futures to reduce exposures to short and intermediate duration interest rates, as our bottom-up process identified an abundance of credits with such durations. Since the futures positions were initiated, they detracted from performance.

¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

² All Sub-Advisors discuss performance on a gross-of-fees basis—meaning that no fees or expenses are reflected in their sleeves'/sleeve's performance. Alternately, Portfolio performance is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. It is important to note that an investment in the Portfolio is only one

component of a balanced investment plan.

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.09% and 0.86%; Class Y—1.03% and 0.61%; and Class P—0.87% and 0.61%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—0.86%; Class Y—0.61%; and Class P—0.61%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 3.75%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Bloomberg US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixedrate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency). Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets	Unadjusted quoted prices in			
	active market for	Other significant	Unobservable	
	identical investments	observable inputs	inputs

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- ¹ Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$106,502,098, represented 50.5% of the Portfolios net assets at period end.
- ² Floating or variable rate securities. The rates disclosed are as of January 31, 2024. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.
- ³ Security, or portion thereof, was on loan at the period end.
- ⁴ Perpetual investment. Date shown reflects the next call date.
- ⁵ Position is unsettled. Contract rate was not determined at January 31, 2024 and does not take effect until settlement.
- ⁶ Rates shown reflect yield at January 31, 2024.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 4.47% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Bloomberg US Government/Credit Bond Index (the "benchmark") returned 3.28%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 47. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)²

The portfolio outperformed its benchmark over the reporting period. Duration management, spread sectors and asset backed securities were the main drivers of performance. Actively managing exposures along the yield curve through the interest rate volatility of the period was additive. Tactical exposure to high yield bonds, agency mortgage-backed securities (MBS), and commercial mortgage-backed securities (CMBS) were positive drivers of performance. Additionally, security selection in investment grade credit and emerging market bonds were additive for returns. A small allocation to municipal bonds detracted as did exposure to the Japanese yen and British pound.

Overall, derivative usage was mixed for performance during the period, primarily driven by derivatives used to adjust interest rate exposure and credit exposure. The Portfolio used a combination of government bond futures and interest rate swaps to adjust interest rate and yield curve exposures, as well as to substitute for physical securities. Credit default swaps were used to manage credit exposure in lieu of the direct buying or selling of physical securities. The use of currency forwards to manage currency exposure detracted from returns.

Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

PACE Select Advisors Trust – PACE Strategic Fixed Income Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisors:

Pacific Investment
Management Company LLC
("PIMCO");

Neuberger Berman Investment Advisers LLC ("Neuberger Berman")

Brown Brothers Harriman & Co. ("BBH")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, David Kelly, Christopher Andersen, CFA, and Eileen Wong (since May 2023)

PIMCO: Mohit Mittal, Michael Cudzil and Marc Seidner

Neuberger Berman: Thanos Bardas, David M. Brown, Adam Grotzinger, Bradley C. Tank and Ashok Bhatia

BBH: Andrew Hofer, Neil Hohmann, Paul Kunz

Objective:

Total return consisting of income and capital appreciation

Investment process:

The main strategies of the subadvisors include:

- A strategy that focuses on those areas of the bond market that the subadvisor considers undervalued.
- An "opportunistic fixed income" strategy that employs a consistently applied, risk managed

(continued on next page)

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Investment process (concluded)

approach to portfolio management that leverages the subadvisor's proprietary fundamental research capabilities, decision making frameworks and quantitative risk management tools.

 A strategy that seeks to invest in a diversified portfolio of fixed income instruments that are performing, durable, and available at an attractive valuation, including floating or variable rate debt instruments.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking total return consisting of income and capital appreciation and who are able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. In addition, investments in foreign bonds involve special risks. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan.

Performance at a glance (unaudited)				
Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years
Before deducting maximum sales charge				
Class A ¹	4.42%	3.91%	1.63%	2.12%
Class Y ²	4.47	4.09	1.88	2.35
Class P ³	4.47	4.18	1.89	2.37

After deducting maximum sales charge				
Class A ¹	0.53	(0.01)	0.86	1.72
Bloomberg U.S. Government/Credit Bond Index ⁴	3.28	2.39	1.13	1.80

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.12% and 1.05%; Class Y—1.03% and 0.80%; and Class P—0.89% and 0.80%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—0.90%; Class Y—0.65%; and Class P—0.65%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 3.75%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Bloomberg US Government/Credit Bond Index is an unmanaged index composed of US government, government-related and investment-grade US corporate issues and non-corporate foreign debentures, denominated in US dollars with at least one year to maturity. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets Description	identical investments observable inputs		quoted prices in active market for Other significant Unobservable

At January 31, 2024, there were no transfers in or out of Level 3.

Securities valued using unobservable inputs, i.e. Level 3, were not considered significant to the Fund.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- ¹ In U.S. dollars unless otherwise indicated.
- ² Floating or variable rate securities. The rates disclosed are as of January 31, 2024. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.
- ³ Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$183,636,480, represented 40.5% of the Portfolios net assets at period end.
- ⁴ Security fair valued by the Valuation Committee under the direction of the Board of Trustees.
- ⁵ Security, or portion thereof, was on loan at the period end.
- ⁶ Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.
- ⁷ Payment-in-kind security for which interest may be paid in cash or additional principal, at the discretion of the issuer.
- ⁸ Perpetual investment. Date shown reflects the next call date.
- ⁹ Rate shown reflects annualized yield at the period end on zero coupon bond.
- ¹⁰ Security purchased on a when-issued basis. When-issued refers to a transaction made conditionally because a security, although authorized, has not yet been issued.
- ¹¹ Bond interest in default.
- ¹² Significant unobservable inputs were used in the valuation of this security; i.e. Level 3.
- ¹³ Security, or portion thereof, pledged as collateral for investments sold short, written options, futures and/or swap agreements.
- ¹⁴ Rates shown reflect yield at January 31, 2024.
- ¹⁵ Zero coupon bond.
- ¹⁶ If the Portfolio is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolio will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced obligation or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced obligation.
- ¹⁷ Payments made or received are based on the notional amount.

See accompanying notes to financial statements.

PACE Municipal Fixed Income Investments

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 2.94% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Bloomberg US Municipal 3-15 Year Blend (2-17) Municipal Bond Index (the "benchmark") returned 2.61%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 84. Please note that the returns shown do not reflect the deduction of taxes that a shareholder could pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Subadvisor's comments (unaudited)²

The Portfolio outperformed its benchmark during the reporting period. Sector allocation and duration and yield curve positioning were the largest positive contributors to returns, whereas security selection was a slight detractor. Sector allocation benefited from strong performance among revenue bonds, particularly among pre-paid gas issues of which the Portfolio was overweight. Furthermore, an overweight toward public power bonds was additive, although this was mitigated by weaker performance among hospital bonds which were laggards. The Portfolio also benefited relative to the benchmark from being underweight general obligation, particularly local issues, which lagged the broad market. Security selection detracted overall, driven by Chicago O'Hare airport and Dayton Texas Independent School District bonds. Stronger performance was experienced among prepaid gas issues.

From a quality perspective, being overweight BBB-rated bonds was additive overall, as this high-yielding segment outperformed higher grade issues as the economic backdrop improved. The reporting period experienced elevated interest rate volatility as yields moved higher during the first half led by hawkish market Federal Reserve (Fed) expectations. Investor sentiment toward rates shifted however during November and December 2023, reflected in a significant rate rally fueled by a more dovish Fed tone and rising expectations for more Fed rate cuts in 2024. The Portfolio's duration posture averaged modestly long versus the

No derivatives were used during the reporting period.

mark which outpaced shorter maturity segments.

PACE Select Advisors Trust – PACE Municipal Fixed Income Investments

Investment Manager: UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisor: Insight North America LLC (formerly, Mellon Investments Corporation) ("Insight")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, David Kelly, Christopher Andersen, CFA, and Eileen Wong (since May 2023)

Insight: Daniel Marques, CFA and Daniel Rabasco, CFA

Objective:

High current income exempt from federal income tax

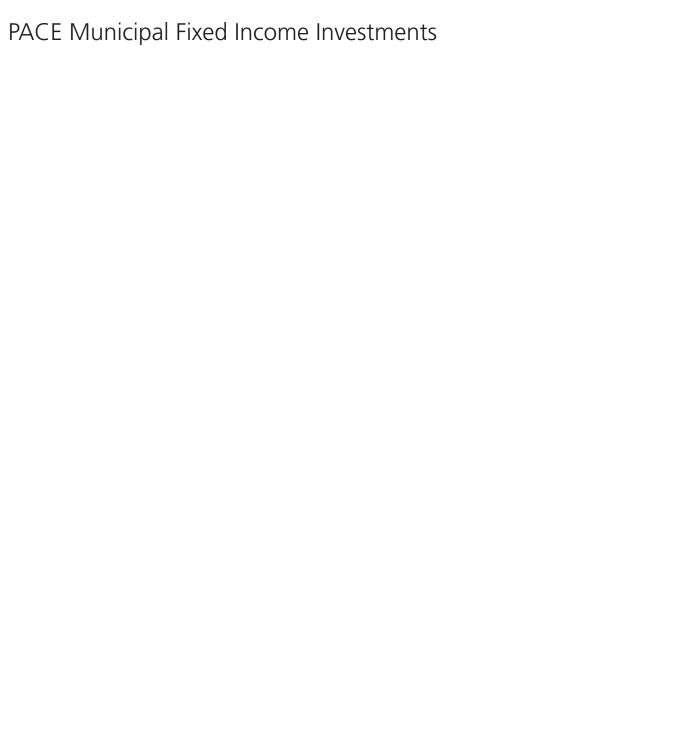

Investment process:

The subadvisor utilizes a strategy that involves investing in undervalued sectors, geographical regions or individual securities.

¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

benchmark, which was generally additive for the reporting period, particularly during the last two months of 2023. Yield curve exposure benefited from being overweight longer 15-20 year rate duration bucket versus the bench-

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking high current income exempt from federal income taxes. Investors should be able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The yield and value of the Portfolio change every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the issuers in which the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan.

PACE Municipal Fixed Income Investments

Performance at a glance (unaudited)

Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years
Before deducting maximum sales charge				
Class A ¹	2.81%	2.47%	1.50%	2.03%
Class Y ²	2.92	2.69	1.76	2.27
Class P ³	2.94	2.72	1.77	2.28
After deducting maximum sales charge				
Class A ¹	0.48	0.18	1.05	1.80
Bloomberg US Municipal 3-15 Year Blend (2-17) Municipal Bond Index ⁴	2.61	2.56	1.97	2.53

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—0.90% and 0.82%; Class Y—1.40% and 0.57%; and Class P—0.64% and 0.57%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—0.82%; Class Y—0.57%; and Class P—0.57%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/ expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 2.25%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Bloomberg US Municipal 3-15 Year Blend Municipal Bond Index is an unmanaged index for the tax-exempt bond market. The Index includes investment-grade municipal bonds with an effective maturity between 2 and 17 years that have at least one year to maturity. Sectors include general obligation, revenue, insured and pre-refunded bonds. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder could pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets	Unadjusted quoted prices in active market for identical investments	Other significant observable inputs	Unobservable inputs	
Description	(Level 1)	(Level 2)	(Level 3)	Total
Municipal bonds	\$—	\$ 193,949,575	\$—	\$ 193,949,575
Short-term investments	_	936,220	_	936,220
Total	\$—	\$194,885,795	\$—	\$194,885,795

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- ¹ Floating or variable rate securities. The rates disclosed are as of January 31, 2024. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.
- ² Rates shown reflect yield at January 31, 2024.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 1.91% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Bloomberg Global Aggregate Bond Index (the "benchmark") returned 2.09%, and the Bloomberg Global Aggregate ex-USD 50% Hedged (USD) index returned 1.15%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 94. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Subadvisor's comments (unaudited)²

The Portfolio outperformed its benchmark during the reporting period, driven by sector allocation/security selection and currency overlay.

In duration, our overweight eurozone duration contributed to returns, as the declining trend of growth and moderating inflation trajectory in the region bolstered the markets to price in European Central Bank easing in the first half of 2023. Over the period, the Portfolio was tactically underweight US duration due to relatively stronger growth outlook and technical headwinds. This was switched to an overweight in November 2023, due to dovish Federal Reserve (Fed) rhetoric and attractive real yields. The overweight was closed in January 2024 due to near-term headwinds amid tight valuations and strong macroeconomic data. An underweight Japan duration, which was held due to expectation of higher yields on the back of high inflation and expectation of a hawkish Bank of Japan, detracted from performance and was scaled back.

In currency, an underweight to the US dollar hurt performance at the start of the reporting period. However, the combination of the announcement from the US Treasury on reduced expectations of issuance and downside surprises in US inflation resulted in the US dollar outperformance during the third quarter of 2023. This started to reverse in November, resulting in strong gains from the sizeable short position in the Portfolio. Elsewhere, an overweight to the Swedish krona was additive, as it benefited strongly from the

positive correlation to equity markets, as well as positive sentiment following the decision by its central bank to hedge their foreign currency reserves.

In terms of sector positioning, the Portfolio held an overweight in agency mortgage-backed securities (MBS) due to attractive valuations. This contributed to returns as spreads tightened on the back of a decline in implied volatility. The Portfolio remains overweight agency MBS due to positive carry (incremental yield) and cheap relative valuations. Elsewhere, an allocation to investment-grade corporate credit allocation/selection contributed to performance on

the back of spread compression. The allocation was focused towards the banking sector over the reporting period. ¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would

have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included,

PACE Select Advisors Trust – PACE Global Fixed Income Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisor:

J.P. Morgan Investment Management, Inc. ("J.P. Morgan")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, David Kelly, Christopher Andersen, CFA, and Eileen Wong (since May 2023)

J.P. Morgan: Iain Stealey, CFA, Linda Raggi, CFA and Myles Bradshaw, CFA

Objective:

High total return

Investment process:

The subadvisor utilizes a strategy that involves investing primarily in global fixed income securities either directly or through the use of financial derivative instruments where appropriate.

would have reduced performance.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Subadvisor's comments (unaudited)2 - concluded

We utilized derivatives over the period for hedging and efficient portfolio management purposes. The main types of financial derivative contracts we use are bond futures and foreign exchange currency forwards contracts. This allows us to implement our strategy, including hedging or implementing currency overlay. Overall, the use of derivatives was beneficial to our portfolio management process.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking high total return and who are able to with-stand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The yield and value of the Portfolio change every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the issuers in which the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan. The value of the Portfolio's investments in foreign securities may fall due to adverse political, social and economic developments abroad and due to decreases in foreign currency values relative to the US dollar. These risks are greater for investments in emerging markets than in more developed countries.

Performance at a glance (unaudited)

Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years
Before deducting maximum sales charge				
Class A ¹	1.78%	(1.08)%	(0.96)%	(0.08)%
Class Y ²	1.79	(0.84)	(0.81)	0.09
Class P ³	1.91	(0.83)	(0.76)	0.12
After deducting maximum sales charge				
Class A ¹	(1.99)	(4.81)	(1.71)	(0.46)
Bloomberg Global Aggregate Bond Index ⁴	2.09	0.93	(0.89)	0.13
Bloomberg Global Aggregate ex USD 50% Hedged (USD) Index ⁵	1.15	(0.18)	(2.37)	(1.09)

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.23% and 1.03%; Class Y—1.09% and 0.87%; and Class P—1.04% and 0.84%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.03%; Class Y—0.87%; and Class P—0.84%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 3.75%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Bloomberg Global Aggregate Bond Index is an unmanaged broad-based, market capitalization-weighted index which is designed to measure the broad investment-grade global fixed income markets for US and non-US government, government-related, corporate and securitized sectors. Investors should note that indices do not reflect the deduction of fees and expenses.
- ⁵ The Bloomberg Global Aggregate ex USD 50% Hedged (USD) Index, is an index which provides a broad-based measure of the global investment grade fixed income markets excluding US dollar-denominated debt and provides 50% of its currency exposure in the US dollar. The other major currency exposures in this index are the Euro, the Japanese yen and, to a lesser extent, the British pound and the Canadian dollar. The two major components of this index are the Pan-European Aggregate and the Asian-Pacific Aggregate indices. The index also includes Canadian, Euro-yen, and other non-USD-denominated investment grade aggregate index eligible securities not already in the indices already noted. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets Description	Unadjus quoted price active market identical investme (Leve	s in for ents	Other significant observable inputs (Level 2)	Unobservable inputs (Level 3)	Total

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- ¹ In U.S. dollars unless otherwise indicated.
- ² Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$19,776,788, represented 10.4% of the Portfolios net assets at period end.
- ³ Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.
- ⁴ Security, or portion thereof, was on loan at the period end.
- ⁵ Floating or variable rate securities. The rates disclosed are as of January 31, 2024. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.
- ⁶ Perpetual investment. Date shown reflects the next call date.
- ⁷ Rates shown reflect yield at January 31, 2024.

PACE High Yield Investments

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 6.12% before the deduction of the maximum PACE Select program fee.¹ In comparison, the ICE BofA Global High Yield Index (hedged in USD) (the "benchmark") returned 6.70%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 107. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Subadvisor's comments (unaudited)²

The portfolio and its benchmark exhibited positive returns during the reporting period. The key contributors to performance were from positive security selection and overweights to the Support Services, Recreation & Travel and Telecom sectors, which were partially offset by security selection and the underweights to the Real Estate Development & Management and the Packaging sectors. From a ratings perspective, security selection and an overweight in B-rated issuers hurt performance the most. Security selection and an underweight in BB-rated issuers were both contributors to performance.

Currency forwards were used during the reporting period to hedge the currency exposure of the portfolio into US dollars. The use of currency forwards had a slight positive impact on the Fund's performance.

PACE Select Advisors Trust – PACE High Yield Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisor:

Nomura Corporate Research and Asset Management Inc. ("NCRAM")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, David Kelly, Christopher Andersen, CFA, and Eileen Wong (since May 2023)

NCRAM: David Crall, CFA, Stephen Kotsen, CFA, Eric Torres, Derek Leung (since June 2023)

Objective:

Total return

Investment process:

The subadvisor utilizes a "total return" strategy driven by credit research and a team effort to generate alpha in high yield.

¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

PACE High Yield Investments

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking total return and who are able to withstand short-term fluctuations in the fixed income markets in return for potentially higher returns over the long term. The Portfolio seeks to achieve its objective by investing primarily in a professionally managed, diversified portfolio of fixed income securities rated below investment grade or considered to be of comparable quality (commonly referred to as "junk bonds"). These securities are subject to higher risks than investment grade securities, including greater price volatility and a greater risk of loss of principal and nonpayment of interest. Issuers of such securities are typically in poor financial health, and their ability to pay interest and principal is uncertain. The prices of such securities may be more vulnerable to bad economic news, or even the expectation of bad news, than higher rated or investment grade bonds and other fixed income securities. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as specific matters relating to the issuers in which the Portfolio invests. In addition, investments in foreign bonds involve special risks. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan.

PACE High Yield Investments

Performance at a glance (unaudited)

Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years or inception
Before deducting maximum sales charge				
Class A ¹	5.97%	8.48%	3.67%	3.72%
Class Y ²	6.08	8.72	3.84	3.94
Class P ³	6.12	8.76	3.83	3.90
Class P2 ^{3,5}	6.22	8.91	N/A	(0.25)
After deducting maximum sales charge				
Class A ¹	1.95	4.38	2.88	3.33
ICE BofA Global High Yield Index Hedged (USD) ⁴	6.70	9.36	4.04	4.55

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.20% and 1.06%; Class Y—0.90% and 0.88%; Class P—1.06% and 0.88%; and P2—0.89% and 0.50%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.06%; Class Y—0.88%; and Class P—0.88%. The Portfolio and UBS AM have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated through November 30, 2024 with respect to Class P2 to waive (i) its management fees in an amount equal to the portion of the management fees UBS AM retains after payment by UBS AM of any sub-advisory fees, and (ii) its administrative services fees in an amount equal to the portion of the administrative services fees UBS AM retains after payment by UBS AM of any sub-administration fees and charges paid to third parties. These fee waiver/ expense reimbursement agreements may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive, if applicable.

- ¹ Maximum sales charge for Class A shares is 3.75%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P and Class P2 shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P and Class P2 shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The ICE BofA Global High Yield Index (Hedged in USD) is an unmanaged index which covers US dollar, Canadian dollar, British pound and Euro denominated below investment-grade corporate debt publicly issued in the major domestic or eurobond markets. Securities must have at least 18 months before final maturity at the time of issuance and have at least one year remaining to final maturity. Callable perpetuals, original issue zero-coupon bonds, eurodollar bonds and 144A securities (with and without registration rights), as well as pay-in-kind securities, are included in the index. Contingent capital securities ("cocos") are excluded from the index, but capital securities where conversion can be mandated by a regulatory authority but with no specific trigger are included. Investors should note that indices do not reflect the deduction of fees and expenses. Effective June 30, 2022, the ICE BofA Global High Yield Index changed its methodology to incorporate a transaction cost element which could affect the performance information for periods following the effective date of this change. Inception return for the Index is for the 10 years ended.
- ⁵ Inception date of Class P2 is September 16, 2021.

N/A = Not applicable.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets	Unadjusted quoted prices in active market for	Other significant	Unobservable	
Description	identical investments	observable inputs	inputs	Takal
Description	(Level 1)	(Level 2)	(Level 3)	Total

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- * Non-income producing security.
- ¹ In U.S. dollars unless otherwise indicated.
- ² Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$107,974,842, represented 56.0% of the Portfolios net assets at period end.
- ³ Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.
- ⁴ Security fair valued by the Valuation Committee under the direction of the Board of Trustees.

- ⁵ Significant unobservable inputs were used in the valuation of this security; i.e. Level 3.
- ⁶ Floating or variable rate securities. The rates disclosed are as of January 31, 2024. For securities based on a published reference rate and spread, the reference rate and spread are indicated within the description. Variable rate securities with a floor or ceiling feature are disclosed at the inherent rate, where applicable. Certain variable rate securities are not based on a published reference rate and spread, but are determined by the issuer or agent and are based on current market conditions; these securities do not indicate a reference rate and spread in the description.
- ⁷ Payment-in-kind security for which interest may be paid in cash or additional principal, at the discretion of the issuer.
- ⁸ Perpetual investment. Date shown reflects the next call date.
- ⁹ This security is considered restricted. At period end, the value of restricted security was \$35,709, represented 0.00% of the Fund's net assets. The table below provides further information.

Restricted security	Acquisition date	Acquisition cost	Acquisition cost as a percentage of net asset	Value at 01/31/24	Value as a percentage of net assets
Aleris International, Inc.	01/10/17	\$ 13,981	0.0%	\$15,900	0.0%
Appcion	08/23/18	650,000	0.0	6,500	0.0
Cloud Peak Energy Resources LLC/Cloud Peak Energy Finance Corp.	09/02/20	544,594	0.0	5,500	0.0
Codere New Holdco SA	12/01/21	141,227	0.0	7,809	0.0

¹⁰ Bond interest in default.

¹¹ Zero coupon bond.

¹² Position is unsettled. Contract rate was not determined at January 31, 2024 and does not take effect until settlement.

¹³ Security, or portion thereof, was on loan at the period end.

¹⁴ Rates shown reflect yield at January 31, 2024.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 2.16% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Russell 1000 Value Total Return index (the "benchmark") returned 2.54%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 138. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)²

The Portfolio was slightly negative relative to its benchmark during the reporting period. Sector allocation was a detractor to relative performance as the portfolio was overweight Consumer Discretionary, which posted the negative return during the period, and underweight Industrials, which outperformed the broader index. This was partially offset by an overweight to Financials, which posted the second-best return in the index. Stock selection was a tailwind. Selection within the Financials and Materials was particularly strong but partially offset by selection in Consumer Staples and Industrials.

Broadly, market sentiment rebounded as markets shifted their focus from financial tightening toward first rate cut. The Portfolio's value orientation versus the benchmark was beneficial but mostly offset by sector headwinds. The cash allocation was a headwind to the performance given the overall positive equity market.

Derivatives were not used during the reporting period.

Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

PACE Select Advisors Trust – PACE Large Co Value Equity Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisors:

Artisan Partners Limited Partnership ("Artisan Partners") Wellington Management Company LLP ("Wellington") Hotchkis and Wiley Capital Management LLC ("Hotchkis & Wiley") (added effective April 14, 2023)

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, Mayoor Joshi, Edward Eccles, Christopher Andersen, CFA, Sofia Westerlund and Shu-Han Hsu

Wellington; Matthew C. Hand, CFA;

Artisan Partners: Daniel J. Okeefe and Michael J. McKinnon;

Hotchkis & Wiley: George H. Davis Jr., Scott McBride and Judd Peters (since April 2023)

Objective:

Capital appreciation and dividend income

Investment process:

The main strategies of the current subadvisors include:

- A "select equity income" strategy in which the subadvisor invests in quality large cap dividend-paying companies, with an emphasis on companies with solid balance sheets and below-market valuations.
- A "select equity" strategy in which the subadvisor

(continued on next page)

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Investment process (concluded)

employs a fundamental investment process to construct a focused portfolio of securities of undervalued US companies across a broad capitalization range.

 A "diversified value" strategy in which the subadvisor seeks to invest in equity securities of large capitalization companies that it considers to be undervalued.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking capital appreciation and dividend income and who are able to withstand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan.

Performance at a glance (unaudited)				
Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years
Before deducting maximum sales charge				
Class A ¹	2.05%	6.57%	8.46%	7.92%
Class Y ²	2.17	6.84	8.73	8.19
Class P ³	2.16	6.81	8.72	8.18
After deducting maximum sales charge				
Class A ¹	(3.58)	0.69	7.24	7.31
Russell 1000 Value Total Return ⁴	2.54	6.08	9.28	8.80

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.13% and 1.13%; Class Y—0.87% and 0.87%; and Class P—0.89% and 0.89%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.14%; Class Y—0.89%; and Class P—0.89%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Russell 1000 Value Total Return measures the performance of the large-cap value segment of the US equity universe. It includes those Russell 1000 Index companies with lower price-to-book ratios and lower expected growth values. The Russell 1000 Value Total Return is constructed to provide a comprehensive and unbiased barometer for the large-cap value segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect value characteristics. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets	Unadjusted quoted prices in active market for identical investments	Other significant observable inputs	Unobservable inputs	
Description	(Level 1)	(Level 2)	(Level 3)	Total
Common stocks	\$ 730,645,424	\$ 14,569,212	\$—	\$ 745,214,636
Short-term investments	_	33,011,223	_	33,011,223
Investment of cash collateral from securities loaned	_	1,730,976	_	1,730,976
Total	\$730,645,424	\$49,311,411	\$—	\$779,956,835

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.

- ¹ Security, or portion thereof, was on loan at the period end.
- ² Rates shown reflect yield at January 31, 2024.

PACE Large Co Growth Equity Investments

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares gained 10.45% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Russell 1000 Growth Total Return index (the "benchmark") returned 9.65%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 145. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)²

The Portfolio outperformed its benchmark during the reporting period. Stock selection in Technology and Consumer Discretionary was positive. The Portfolio outperformed despite more challenging stock selection in the Healthcare sector. Sector allocation was only a modest negative as positive impact from an underweight to Consumer Staples was offset by negative results due to an overweight to Energy. The Portfolio's underweight exposure to large benchmark constituents, such as Apple and Tesla, was a significant tailwind, which was a reversal from prior months.

Risk factors were modestly supportive of performance for the period. The Portfolio benefited from its momentum exposure, but it was partially offset by profitability exposure.

Derivatives were not used during the reporting period.

PACE Select Advisors Trust – PACE Large Co Growth Equity Investments

The main strategies of the subadvisors include:

 A strategy in which the subadvisor seeks to identify companies with secular business

(continued on next page)

¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

PACE Large Co Growth Equity Investments

Investment process (concluded)

models and opportunities to generate consistent, long-term growth of intrinsic business value.

- A strategy in which the subadvisor seeks to identify companies with sustainable competitive advantages and ample opportunities to grow and reinvest capital at high rates of return.
- A strategy in which the subadvisor employs a concentrated, fundamentally driven sustainable growth strategy.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking capital appreciation who are able to with-stand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. Also, to the extent the Portfolio invests a large portion of its assets in a particular sector, the Portfolio may experience greater volatility and risk of loss due to unfavorable developments in that sector. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan.

9.65

34.99

18.04

15.48

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.15% and 1.13%; Class Y—0.88% and 0.88%; and Class P—0.91% and 0.88%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.13%; Class Y—0.88%; and Class P—0.88%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Russell 1000 Growth Total Return measures the performance of the large-cap growth segment of the US equity universe. It includes those Russell 1000 Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000 Growth Total Return is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Investment of cash collateral from securities loaned	_	1	1,278,974	_	1,278,974	
Total	\$799,833,697	\$8	,825,222	\$	\$808,658,919	

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- * Non-income producing security.
- ¹ Security, or portion thereof, was on loan at the period end.
- ² Rates shown reflect yield at January 31, 2024.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 1.41% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Russell 2500 Value Total Return index (the "benchmark") returned 0.62%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 152. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)²

The Portfolio outperformed its benchmark during the reporting period. Stock selection was the primary contributor to relative returns. Stock selection within the Consumer Discretionary and Financials sectors was mostly positive, which was only partially offset by negative results in Materials. Sector allocation was an additional tailwind relative to the benchmark, due to positioning across multiple sectors.

Overall, the fund's style profile was negative given its tilts against certain aspects of value, particularly book-to-price.

The Portfolio was restructured during the reporting period as Victory (Integrity Asset Management) and ARGA were added as sub-advisors in December 2023 while Huber was terminated.

Derivatives were not used during the reporting period.

PACE Select Advisors Trust – PACE Small/Medium Co Value Equity Investments

Investment Manager: UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisors:

Kayne Anderson Rudnick, LLC ("Kayne Anderson Rudnick"); Sapience Investments, LLC ("Sapience"); Huber Capital Management LLC ("Huber") (Terminated effective December 19, 2023) ARGA Investment Management, LP ("ARGA") (Commenced managing a portion of the fund December 19, 2023) Victory Capital Management Inc., through its business unit branded as Integrity Asset Management ("Victory") (Commenced managing a portion of the fund December 19, 2023)

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, Mayoor Joshi, Edward Eccles, Christopher Andersen, CFA, Sofia Westerlund and Shu-Han Hsu

Kayne Anderson Rudnick: Julie Kutasov and Craig Stone Sapience: Samir Sikka; Huber Capital: Joseph Huber ARGA: A. Rama Krishna, CFA, Sujith P. Kumar, and Robert Mitchell, PhD. (since December 2023.)

Victory: Daniel G. Bandi, CFA, Daniel J. DeMonica, CFA, Adam I. Friedman, Joe A. Gilbert, CFA, J. Bryan Tinsley, CFA, and Michael P. Wayton, (since December 2023.)

(continued on next page)

Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Objective:

Capital appreciation

Investment process:

The main strategies of the subadvisors include:

- A "value equity" strategy in which the subadvisor targets smaller capitalization companies with sustainable business models selling below their perceived value.
- A strategy that employs a fundamental, bottom-up, research-driven investment style and follows a disciplined investment process to identify high-quality companies.
- A "deep value" strategy that seeks long-term total investment return through capital appreciation, generally investing in common stocks of US companies that are considered to be undervalued.
- A flexible value strategy that utilizes fundamental, bottomup stock selection with topdown inputs considered as part of the sector allocation process.
- A disciplined valuationfocused strategy based on deep fundamental research.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking capital appreciation who are able to with-stand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan. In addition, small- and mid-cap companies are typically subject to a greater degree of change in earnings and business prospects than are larger, more established companies. Therefore, they are considered to have a higher level of volatility and risk.

Class A ¹	(4.29)	(5.26)	7.35	6.42					
Russell 2500 Value Total Return ⁴	0.62	2.49	7.85	7.41					

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.26% and 1.26%; Class Y—1.06% and 1.05% and Class P—1.08% and 1.05%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.29%; Class Y—1.04%; and Class P—1.04%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed this expense cap and that UBS AM has not waived the right to do so.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Russell 2500 Value Total Return measures the performance of the small to mid-cap value segment of the US equity universe. It includes those Russell 2500 Index companies with lower price-to-book ratios and lower forecasted growth values. The Russell 2500 Value Total Return is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap value market. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set and that the represented companies continue to reflect value characteristics. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

For a listing of defined portfolio acronyms that are used throughout the Portfolio of investments as well as the tables that follow, please refer to the Glossary of terms used in the Portfolio of investments.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets Description	Unadjusted quoted prices in active market for identical investments (Level 1)	Other sig observabl		Unobservable inputs (Level 3)	Total
Common stocks	\$ 290,878,698	\$	_	\$—	\$ 290,878,698
Short term investments	_	5,342,818		_	5,342,818
Investment of cash collateral from securities loaned	_	1,194,955		_	1,194,955
Total	\$290,878,698	\$6,	537,773	\$—	\$297,416,471

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- * Non-income producing security.
- ¹ Security, or portion thereof, was on loan at the period end.
- ² Rates shown reflect yield at January 31, 2024.

PACE Small/Medium Co Growth Equity Investments

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned -2.51% before the deduction of the maximum PACE Select program fee.¹ In comparison, the Russell 2500 Growth Total Return index (the "benchmark") returned -0.79%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 161. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)²

The Portfolio underperformed its benchmark during the reporting period. Negative stock selection was the primary driver of relative underperformance. Health Care holdings were the largest relative drag on returns, most notably among medical devices names as the rise of GLP-1 weight loss drugs had a significant negative impact on investors' views of the need for many procedures. Industrials holdings were challenged as Human Capital Management providers Paylocity and Paycor HCM both declined late in 2023 as investors speculated that peak employment and peak interest rates would dampen short-term growth for payroll companies. Individual selections within Information Technology were also a headwind for results.

Sector allocation decisions were modestly additive, including an overweight to the Information Technology sector and an underweight to the Materials sector. Additionally, the impact of risk factor exposures were positive during the period. The Portfolio's tilt toward companies with above benchmark quality and momentum were rewarded.

Derivatives were not used during the reporting period.

Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

PACE Select Advisors Trust – PACE Small/Medium Co Growth Equity Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisors:

Riverbridge Partners, LLC ("Riverbridge"); Calamos Advisors LLC ("Calamos"), Jacobs Levy Equity Management, Inc. ("Jacobs Levy")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, Mayoor Joshi, Edward Eccles, Christopher Andersen, CFA, Sofia Westerlund and Shu-Han Hsu Riverbridge: Ross Johnson;

Calamos: Brandon Nelson Jacobs Levy: Bruce I. Jacobs and Kenneth N. Levy

Objective:

Capital appreciation

Investment process:

The main strategies of the subadvisors include:

- A growth strategy that focuses on companies viewed as building their earnings power and intrinsic value.
- A strategy in which the subadvisor seeks to identify and exploit the perception gap that exits between a company's business strength and the market's expectation of that strength.
- A strategy in which the subadvisor invests primarily in growth-oriented equity securities of small- and mid-cap companies selected based on a multidimensional quantitative investment process.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking capital appreciation who are able to with-stand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan. In addition, small- and mid-cap companies are typically subject to a greater degree of change in earnings and business prospects than are larger, more established companies. Therefore, they are considered to have a higher level of volatility and risk. Also, to the extent the Portfolio invests a large portion of its assets in a particular sector, the Portfolio may experience greater volatility and risk of loss due to unfavorable developments in that sector.

PACE Small/Medium Co Growth Equity Investments

Performance at a glance (unaudited)							
Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years			
Before deducting maximum sales charge							
Class A ¹	(2.52)%	4.41%	7.93%	7.66%			
Class Y ²	(2.47)	4.56	8.09	7.86			
Class P ³	(2.51)	4.54	8.09	7.81			
After deducting maximum sales charge							
Class A ¹	(7.87)	(1.36)	6.71	7.05			
Russall 2500 Growth Total Return ⁴	(0.79)	5.66	8.45	8 7/1			

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.26% and 1.26%; Class Y—1.02% and 1.02% and Class P—1.13% and 1.08%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to share-holder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.33%; Class Y—1.08%; and Class P—1.08%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed this expense cap and that UBS AM has not waived the right to do so.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The Russell 2500 Growth Total Return measures the performance of the small to mid-cap growth segment of the US equity universe. It includes those Russell 2500 Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2500 Growth Total Return is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap growth market. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set and that the represented companies continue to reflect growth characteristics. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

For a listing of defined portfolio acronyms that are used throughout the Portfolio of investments as well as the tables that follow, please refer to the Glossary of terms used in the Portfolio of investments.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets Description	Unadjusted quoted prices in active market for identical investments (Level 1)	Other sig observabl	,	Unobservable inputs (Level 3)	Total
Common stocks	\$ 267,628,256	\$		\$-	\$ 267,628,256
Short-term investments	_	1	,435,303	_	1,435,303
Investment of cash collateral from securities loaned	_	4	,472,917	_	4,472,917
Total	\$267,628,256	\$5,	908,220	\$—	\$273,536,476

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- * Non-income producing security.
- ¹ Security, or portion thereof, was on loan at the period end.
- ² Security fair valued by the Valuation Committee under the direction of the Board of Trustees.
- ³ Significant unobservable inputs were used in the valuation of this security; i.e. Level 3.
- ⁴ Rates shown reflect yield at January 31, 2024.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 2.62% before the deduction of the maximum PACE Select program fee.¹ In comparison, the MSCI EAFE Index net (USD) (the "benchmark") returned 3.15%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 171. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)²

The Portfolio modestly underperformed its benchmark during the reporting period. Stock selection was the primary driver of negative relative return though sector allocation was positive. Selection within Financials, Communication Services, and Consumer Discretionary was particularly weak but partly offset by better selection in Consumer Staples. Positive sector allocation was from the overweight to Information Technology and the underweight to Consumer Staples. From a country perspective, the overweight to Singapore was a headwind. Opportunistic allocation to China was also negative relative to the benchmark. Stock selection was strong in Japan and United Kingdom but partially offset by selections in Denmark, US, and Australia. The cash allocation was a headwind on performance given better equity markets.

Broadly, the fund remained relatively style neutral and balanced. The underperformance was more from idiosyncratic selections.

Derivatives were not used during the reporting period.

Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

PACE Select Advisors Trust – PACE International Equity Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisors:

Mondrian Investment Partners Limited ("Mondrian"); Chautauqua Capital Management, a division of Robert W. Baird & Co. Incorporated ("Baird"); Los Angeles Capital Management and Equity Research, LLC ("Los Angeles Capital")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, Mayoor Joshi, Edward Eccles, Christopher Andersen, CFA, Sofia Westerlund and Shu-Han Hsu

Mondrian: Elizabeth A.
Desmond, Nigel Bliss and Steve
Dutaut;
Baird: Jesse Flores, CFA,

Baird: Jesse Flores, CFA, Haicheng Li, CFA, Nathaniel Velarde; Los Angeles Capital: Hal W. Reynolds, CFA, Daniel E. Allen, CFA, and Laina Draeger, CFA

Objective:

Capital appreciation

Investment process:

The main strategies of the subadvisors include:

 A strategy that invests in durable large-cap franchises that can grow excess returns on capital well into the future and trade at a significant discount to the subadvisor's estimate of the true worth of these operations.

(continued on next page)

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Investment process (concluded)

- A "long/short" or "130/30" equity strategy in which the subadvisor will buy securities "long" that it believes will outperform the market or decrease portfolio risk, sells securities "short" that it believes will underperform the market and may invest the proceeds from those sales in additional securities.
- A strategy that involves achieving consistent risk adjusted excess returns by managing a concentrated portfolio of quality, growth companies generally headquartered outside of the United States.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking capital appreciation who are able to withstand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan. The value of the Portfolio's investments in foreign securities may fall due to adverse political, social, and economic developments abroad and due to decreases in foreign currency values relative to the US dollar. These risks are greater for investments in emerging market issuers than for issuers in more developed countries.

Performance at a glance (unaudited)

Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years or inception
Before deducting maximum sales charge				
Class A ¹	2.45%	10.51%	7.32%	5.18%
Class Y ²	2.61	10.73	7.61	5.46
Class P ³	2.62	10.77	7.61	5.46
Class P2 ^{3,5}	2.85	N/A	N/A	13.35
After deducting maximum sales charge				
Class A ¹	(3.16)	4.43	6.11	4.59
MSCI EAFE Index net (USD) ⁴	3.15	10.01	6.92	4.77

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.87% and 1.75%; Class Y—1.60% and 1.51%; Class P—1.59% and 1.50%; and Class P2—1.46% and 0.85%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.25%; Class Y—1.00%; and Class P—1.00%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The Portfolio and UBS AM have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated through November 30, 2024 with respect to Class P2 to waive (i) its management fees in an amount equal to the portion of the management fees UBS AM retains after payment by UBS AM of any sub-advisory fees, and (ii) its administrative services fees in an amount equal to the portion of the administrative services fees UBS AM retains after payment by UBS AM of any sub-administration fees and charges paid to third parties. These fee waiver/expense reimbursement agreements may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive, if applicable.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P and Class P2 shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P and Class P2 shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The MSCI EAFE Index net (USD) is an index of stocks designed to measure the investment returns of developed economies outside of North America. Net total return indices reinvest dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The Index is constructed and managed with a view to being fully investable from the perspective of international institutional investors. Investors should note that indices do not reflect the deduction of fees and expenses. Inception return for the Index is for the 10 years ended.
- ⁵ Inception date of Class P2 is March 27, 2023.

N/A = Not applicable.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

For a listing of defined portfolio acronyms that are used throughout the Portfolio of investments as well as the tables that follow, please refer to the Glossary of terms used in the Portfolio of investments.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets Description	Unadjusted quoted prices in active market for identical investments (Level 1)	Other significant observable inputs (Level 2)	Unobservable inputs (Level 3)	Total
Common stocks	\$ 68,856,569	\$ 744,456,925	\$—	\$ 813,313,494

PACE International Equity Investments Portfolio of investments—January 31, 2024 (unaudited)

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- * Non-income producing security.
- ¹ Security, or portion thereof, pledged as collateral for investments sold short.
- ² Security, or portion thereof, was on loan at the period end.
- ³ Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$10,010,209, represented 1.4% of the Portfolios net assets at period end.
- ⁴ Security fair valued by the Valuation Committee under the direction of the Board of Trustees.
- ⁵ Rates shown reflect yield at January 31, 2024.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned -7.50% before the deduction of the maximum PACE Select program fee.¹ In comparison, the MSCI Emerging Markets Index net (USD) (the "benchmark") returned -6.00%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 184. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)²

The Portfolio underperformed its benchmark during the reporting period. Sector allocation was the primary driver of relative return while stock selection was also negative. Within sector allocation, the overweight to Consumer Discretionary and Industrials, and the underweight to Utilities were the top detractors relative to the benchmark. Selections within Communication Services and Real Estate were particularly weak but partly offset by better selections in Consumer Discretionary and Information Technology. From a country perspective, the overweight to China and Hong Kong was a headwind amid the prolonged slowdown in China. The underweight to some outperforming countries like India and Taiwan was also negative. Opportunistic allocations to US were positive relative to the benchmark but unable to mitigate the headwinds. Stock selection was strong in China, Korea, and Taiwan but partially offset by negative selection in India and Brazil. The cash allocation was a tailwind on performance given the overall weakness of the equity market.

Broadly, the fund suffered from higher risk exposure as the emerging markets continued to be heavily impacted by the weak China market. The fund's positioning was not rewarded given that markets preferred value leaning, lower beta, and more defensive positioning.

Derivatives were not used during the reporting period.

PACE Select Advisors Trust – PACE International Emerging Markets Equity Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisors:

William Blair & Company L.L.C. ("William Blair"); RWC Asset Advisors (US) LLC ("Redwheel"); ARGA Investment Management LP ("ARGA")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, Mayoor Joshi, Edward Eccles, Christopher Andersen, CFA, Sofia Westerlund and Shu-Han Hsu

William Blair: Todd M. McClone, Hugo Scott-Gall, Ian Smith and Paul Birchenough Redwheel: John Malloy ARGA: A. Rama Krishna, CFA, Takashi Ito, CFA and Sujith Kumar

Objective:

Capital appreciation

Investment process:

The main strategies of the current subadvisors include:

- A strategy that invests in mid and large cap companies with a quality growth orientation.
- A strategy that uses a disciplined, deep value strategy based on fundamental research.
- A strategy that combines top-down analyses of economic, political and social factors with bottom-up

(continued on next page)

Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Investment process (concluded)

quantitative and qualitative fundamental research to seek to identify countries, sectors and companies with robust growth characteristics.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking capital appreciation who are able to with-stand short-term fluctuations in the equity markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies in whose securities the Portfolio invests. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan. The value of the Portfolio's investments in foreign securities may fall due to adverse political, social and economic developments abroad, and due to decreases in foreign currency values relative to the US dollar. These risks are greater for investments in emerging market issuers than for issuers in more developed countries.

Performance at a glance (unaudited)

Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years or inception
Before deducting maximum sales charge				
Class A ¹	(7.56)%	(5.24)%	1.67%	2.11%
Class Y ²	(7.46)	(4.94)	1.93	2.37
Class P ³	(7.50)	(5.04)	1.90	2.35
Class P2 ^{3,5}	(7.28)	N/A	N/A	4.94
After deducting maximum sales charge				
Class A ¹	(12.64)	(10.44)	0.53	1.54
MSCI Emerging Markets Index net (USD) ⁴	(6.00)	(2.94)	0.99	2.86

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.68% and 1.46%; Class Y—1.43% and 1.21%; Class P—1.46% and 1.21%; and Class P2—1.31% and 0.92%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.45%; Class Y—1.20%; and Class P—1.20%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The Portfolio and UBS AM have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated through November 30, 2024 with respect to Class P2 to waive (i) its management fees in an amount equal to the portion of the management fees UBS AM retains after payment by UBS AM of any sub-advisory fees, and (ii) its administrative services fees in an amount equal to the portion of the administrative services fees UBS AM retains after payment by UBS AM of any sub-administration fees and charges paid to third parties. These fee waiver/expense reimbursement agreements may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive, if applicable.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P and Class P2 shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P and Class P2 shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ The MSCI Emerging Markets Index net (USD) is a market capitalization-weighted index composed of different emerging market countries in Europe, Latin America, and the Pacific Basin. Net total return indices reinvest dividends after the deduction of withholding taxes, using a tax rate applicable to nonresident institutional investors who do not benefit from double taxation treaties. The index is constructed and managed with a view to being fully investable from the perspective of international institutional investors. Investors should note that indices do not reflect the deduction of fees and expenses. Inception return for the Index is for the 10 years ended.
- ⁵ Inception date of Class P2 is March 16, 2023.

N/A = Not applicable.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets	Unadjusted quoted prices in active market for identical investments	Other significant observable inputs	Unobservable inputs	
Description	(Level 1)	(Level 2)	(Level 3)	Total
Common stocks	\$ 104,747,915	\$ 247,733,793	\$—	\$ 352,481,708
Preferred stocks	2,346,816	_	_	2,346,816
Rights	1,061	_	_	1,061
Short-term investments	_	4,358,716	_	4,358,716
Investment of cash collateral from securities loaned	_	9,123,135	_	9,123,135
Total	\$107,095,792	\$261,215,644	\$—	\$368,311,436

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- * Non-income producing security.
- ¹ Security, or portion thereof, was on loan at the period end.
- ² Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$15,120,886, represented 4.2% of the Portfolios net assets at period end.
- ³ Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.
- ⁴ Security fair valued by the Valuation Committee under the direction of the Board of Trustees.
- ⁵ Significant unobservable inputs were used in the valuation of this security; i.e. Level 3.
- ⁶ Rates shown reflect yield at January 31, 2024.

See accompanying notes to financial statements.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 0.43% before the deduction of the maximum PACE Select program fee.¹ In comparison, the FTSE EPRA Nareit Developed Index (the "benchmark") returned 0.92%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 192. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Subadvisor's comments (unaudited)²

The Portfolio underperformed its benchmark during the reporting period. Stock selection in the industrial REITs sub-industry contributed to performance. Within this sub-industry, the Portfolio's holdings of industrial property and business space management firm Goodman Group (Australia) and real estate investment trust Prologis Property Mexico (Mexico) benefited results. Additionally, an overweight holding of real estate investment trust Prologis also helped results.

An underweight position in the health care REITs sub-industry also aided relative performance. Here, avoiding shares of poor-performing real estate investment trust Medical Properties Trust bolstered our relative results. An overweight position in the health care facilities sub-industry also boosted returns, led by the Portfolio's holding of healthcare management company Universal Health Services.

Stock selection in the diversified real estate activities sub-industry buoyed results as well. Within this sub-industry, not owning shares of real estate development company Sun Hung Kai Properties (Hong Kong) and an overweight position in shares of real estate company Mitsui Fudosan (Japan) positively impacted relative performance.

Elsewhere, avoiding poor-performing real estate company Realty Income and real estate investment trust Wharf Real Estate Investment (Hong Kong) helped relative results.

The Portfolio's cash and/or cash equivalents position during the period was another contributor to performance. Under normal market conditions, the Portfolio strives to be fully invested and generally holds cash to buy new holdings and to provide liquidity.

PACE Select Advisors Trust – PACE Global Real Estate Securities Investments

Investment Manager:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisor:

Massachusetts Financial Services Company (d/b/a MFS Investment Management) ("MFS")

Portfolio Management Team:

UBS AM: Mabel Lung, CFA, Fred Lee, CFA, Mayoor Joshi, Edward Eccles, Christopher Andersen, CFA, Sofia Westerlund and Shu-Han Hsu

MFS: Rick Gable and Mark Syn

Objective:

Total Return

Investment process:

The main strategies of the sub-advisor include:

• a strategy that focuses on investments in equity REITs as well as similar entities formed under the laws of non-US countries, and the subadvisor may also invest in mortgage REITs, hybrid REITs and other US and foreign real estaterelated investments, including emerging market real estate-related investments.

¹ Class P shares held through the PACE Select Advisors Program are subject to a maximum Program fee of 2.50%, which, if included, would have reduced performance. Class P shares held through other advisory programs also may be subject to a program fee, which, if included, would have reduced performance.

² Performance is discussed on a gross-of-fees basis—meaning that no fees or expenses are reflected when discussed at the level of a subadvisor's sleeve (or subadvisors' sleeves, if applicable). Alternatively, performance at the overall Portfolio level is shown net of fees, which does factor in fees and expenses associated with the Portfolio.

Stock selection in the real estate operating companies sub-industry detracted from performance, led by the Portfolio's overweight holding of real estate investment trust CapitaLand Investment (Singapore).

Stock selection and, to lesser extent, an underweight position in the retail REITs sub-industry also held back performance. Here, the timing of the Portfolio's ownership in shares of property developer and manager Simon Property Group weakened relative results. We eliminated the position during the reporting period.

Elsewhere, the Portfolio's holdings of real estate services provider Katitas (Japan), telecommunications tower operator Helios Towers (UK), real estate investment trust Rayonier and telecommunications services provider Cellnex Telecom³ (Spain) held back returns. Additionally, an underweight position in shares of real estate investment trust Digital Realty Trust also weakened results. The Portfolio's overweight holdings of real estate investment trusts Equity Lifestyle Properties and Granite Real Estate Investment Trust (Canada) further hindered performance. Lastly, not owning the out-performing healthcare infrastructure company Welltower held back results relative to the benchmark.

During the reporting period, the Portfolio's relative currency exposure, resulting primarily from differences between the Portfolio's and the benchmark's exposures to holdings of securities denominated in foreign currencies, was another detractor from performance. All our investment decisions are driven by the fundamentals of each individual opportunity and as such, it is common for our portfolios to have different currency exposure than the benchmark.

The Portfolio did not utilize derivatives during the reporting period.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for long-term investors seeking to diversify a portion of their assets into real estate related investments. Investors should be willing to withstand short-term fluctuations in the equity and real estate markets in return for potentially higher returns over the long term. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the companies or issuers in whose securities the Portfolio invests. The value of the Portfolio's investments in foreign securities may fall due to adverse political, social, and economic developments abroad, and due to decreases in foreign currency values relative to the US dollar. These risks are greater for investments in emerging market issuers than for issuers in more developed countries. There are certain risks associated with investing in real estate-related investments, including sensitivity to economic downturns, interest rates, declines in property values and variation in property management.

Performance at a glance (unaudited)

Average annual total returns for periods ended 01/31/24	6 months	1 year	5 years	10 years
Before deducting maximum sales charge				
Class A ¹	0.28%	(3.24)%	(0.43)%	2.74%
Class P ²	0.43	(3.10)	(0.18)	3.00
After deducting maximum sales charge				
Class A ¹	(5.19)	(8.60)	(1.56)	2.15
FTSE EPRA Nareit Developed Index ³	0.92	(2.38)	0.84	4.12

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—1.71% and 1.45% and Class P—1.74% and 1.20%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.45% and Class P—1.20%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed these expense caps and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² Class P shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ³ The FTSE EPRA Nareit Developed Index is designed to measure the stock performance of companies engaged in certain real estate activities of the North American, UK, European and Asian real estate markets. Relevant real estate activities are defined as the ownership, trading and development of income-producing real estate. Investors should note that indices do not reflect the deduction of fees and expenses.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

PACE Global Real Estate Securities Investments Portfolio of investments—January 31, 2024 (unaudited)

For a listing of defined portfolio acronyms that are used throughout the Portfolio of investments as well as the tables that follow, please refer to the Glossary of terms used in the Portfolio of investments.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets	Unadjusted quoted prices in active market for identical investments	Other significant observable inputs	Unobservable inputs	
Description	(Level 1)	(Level 2)	(Level 3)	Total
Common stocks	\$ 43,623,864	\$ 18,985,970	\$—	\$ 62,609,834
Short-term investments	_	995,607	_	995,607
Investment of cash collateral from securities loaned	_	2,164,687	_	2,164,687
Total	\$43,623,864	\$22,146,264	\$—	\$65,770,128

At January 31, 2024, there were no transfers in or out of Level 3.

Portfolio footnotes

- * Non-income producing security.
- ¹ Security, or portion thereof, was on loan at the period end.
- ² Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$905,372, represented 1.4% of the Portfolios net assets at period end.
- ³ Rates shown reflect yield at January 31, 2024.

Performance (unaudited)

For the six-months ended January 31, 2024, the Portfolio's Class P shares returned 4.35% before the deduction of the maximum PACE Select program fee. In comparison, the FTSE Three-Month US Treasury Bill Index (the "benchmark") returned 2.81%, the Bloomberg Global Aggregate Index returned 2.09%, the MSCI World Index net (USD) returned 5.31%, the HFRI Fund of Funds Composite Index returned 3.45%. (Returns for all share classes over various time periods are shown in the "Performance at a glance" table on page 200. Please note that the returns shown do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.) For a detailed commentary on the market environment in general during the reporting period, please refer to page 3.

Investment Manager's comments (unaudited)^{2,3}

The portfolio outperformed its benchmark during the reporting period. This was primarily driven by allocations to the macro trading, merger arbitrage, equity market neutral and equity long-short strategies. Allocations to a long/short equity strategy focused on energy transition themes underperformed the benchmark.

The macro trading strategy contributed most to performance as positions across multiple sub-strategies added value. Directional trades in high yield bonds as well as US and Japanese equities were rewarded and opportunistic UK rate trades also performed positively. The long/short global equity strategy allocation also benefited the portfolio as tilts towards stocks with both value and momentum characteristics were rewarded.

The absolute return equity market neutral strategy added value via security selection in the Industrials and Health Care sectors where long positions outperformed short positions. The merger arbitrage strategy added value as global antitrust approvals enabled the portfolio to generate positive returns from impacted deal spreads.

The long/short equity strategy focused on energy transition themes underperformed as the sub-advisor reduced gross and net exposures to help mitigate risk which reduced their ability to capture much market upside. Positioning in utility companies and renewable energy companies hurt performance.

Derivatives were used in the Portfolio to gain economic exposure and for hedging or risk management purposes across currencies, fixed income and equity markets. The derivatives utilized over the period included forwards (both deliverable and non-deliverable), options, futures, forwards and swaps.

PACE Select Advisors Trust – PACE Alternative Strategies Investments

Investment Manager and Portfolio Sleeve Advisor:

UBS Asset Management (Americas) LLC ("UBS AM")

Investment Subadvisors:

(continued on next page)

Portfolio Management Team (concluded)

David Kelly and Mayoor Joshi; Electron: Ran Zhou and Neil

Objective:

Long-term capital appreciation

Investment process

The main strategies of the subadvisors include:

- An "opportunistic strategy" in which UBS AM allocates a portion of the fund's assets primarily to unaffiliated actively- and passively-managed pooled investment vehicles that UBS AM believes are suitable for return generation, risk management or both.
- A "long/short global equity" strategy in which the subadvisor buys securities "long" that the subadvisor believes will out-perform the market, and sells securities "short" that the subadvisor believes will underperform the market.
- A "global unconstrained multi-strategy" strategy that identifies and pursues diverse strategies across asset classes, sectors, currencies, interest rates, inflation and volatility that are expected to work well together whether markets are rising or falling.
- An "absolute return equity market neutral" strategy that aims to earn a positive absolute and attractive risk-adjusted return while demonstrating low correlation with, and lower volatility than, traditional long-only investment portfolios.
- A "long/short US, small cap equity" strategy in which the subadvisor primarily buys securities of US small capitalization companies "long" that the subadvisor believes will out-perform the market, and sells securities of US small capitalization companies "short" that the subadvisor believes will underperform the market.
- A "relative value strategy" that seeks to generate risk-adjusted returns that are uncorrelated to the equity or credit markets by isolating opportunities in the convertible bond, high yield and listed options markets.
- A "merger arbitrage strategy" that seeks to achieve absolute returns utilizing a rule-based approach to investing.
- A "long/short global equity" strategy focused on renewable energy and the associated supply chain in which the subadvisor seeks to achieve absolute returns by buying primarily publicly traded equity securities "long" that the subadvisor believes will out-perform the market and selling primarily publicly traded equity securities "short" that the subadvisor believes will underperform the market.

Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568 or by visiting our Website at www.ubs.com/am-us.

Special considerations

The Portfolio may be appropriate for investors seeking long-term capital appreciation who are able to with-stand short-term fluctuations in the equity markets and fixed income markets in return for potentially higher returns over the long term. The Portfolio may employ investment strategies that involve greater risks than the strategies used by many other mutual funds, including increased use of short sales (which involve the risk of an unlimited increase in the market value of the security sold short, which could result in a theoretically unlimited loss), leverage and derivative transactions, and hedging strategies. The value of the Portfolio changes every day and can be affected by changes in interest rates, general market conditions, and other political, social and economic developments, as well as specific matters relating to the issuers of securities in which the Portfolio invests. The value of the Portfolio's investments in foreign securities may fall due to adverse political, social and economic developments abroad, and due to decreases in foreign currency values relative to the US dollar. It is important to note that an investment in the Portfolio is only one component of a balanced investment plan.

Performance at a glance (unaudited)

Average annual total returns for periods ended 01/31/24	6 months	1 vear	5 years	10 years or inception
Before deducting maximum sales charge	o mondis	i yeui	3 years	териоп
Class A ¹	4.28%	4.08%	3.99%	2.52%

Class P ³	4.35	4.35	4.23	2.78
Class P2 ^{3,4}	4.52	4.13	N/A	5.09
After deducting maximum sales charge				
Class A ¹	(1.43)	(1.61)	2.83	1.95
FTSE 3-Month U.S. Treasury Bill Index ⁵	2.81	5.36	1.97	1.30
Bloomberg Global Aggregate Index ⁶	2.09	0.93	(0.89)	0.13
MSCI World Index net (USD) ⁷	5.31	16.99	11.39	9.14
HFRI Fund of Funds Composite Index ⁸	3.45	4.88	4.74	3.36

The annualized gross and net expense ratios, respectively, for each class of shares as in the prospectuses dated November 28, 2023 were as follows: Class A—3.09% and 2.76%; Class Y—2.82% and 2.51%; Class P—2.83% and 2.51%; and Class P2—2.10% and 1.41%. Net expenses reflect fee waivers and/or expense reimbursements, if any, pursuant to an agreement that is in effect to cap the expenses. The Portfolio and UBS Asset Management (Americas) LLC ("UBS AM") have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees through November 30, 2024 to the extent necessary to offset the cost savings to UBS AM for allocating a portion of the Portfolio's assets to other unaffiliated pooled investment vehicles and index futures. The agreement also provides that UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the Portfolio's ordinary total operating expenses of each class through November 30, 2024 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, trustee elections, as well as other matters related to shareholder meetings (unless specifically agreed by UBS AM) and extraordinary expenses) would not exceed Class A—1.83%; Class Y—1.58%; and Class P—1.58%. The Portfolio has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the Portfolio's expenses in any of those three years to exceed this expense cap and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive. The Portfolio and UBS AM have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated through November 30, 2024 with respect to Class P2 to waive (i) its management fees in an amount equal to the portion of the management fees UBS AM retains after payment by UBS AM of any sub-advisory fees, and (ii) its administrative services fees in an amount equal to the portion of the administrative services fees UBS AM retains after payment by UBS AM of any sub-administration fees and charges paid to third parties. These fee waiver/expense reimbursement agreements may be terminated by the Portfolio's board at any time and also will terminate automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive, if applicable.

- ¹ Maximum sales charge for Class A shares is 5.5%. Class A shares bear ongoing 12b-1 service fees of 0.25% annually.
- ² The Portfolio offers Class Y shares to a limited group of eligible investors, including certain qualifying retirement plans. Class Y shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees.
- ³ Class P and Class P2 shares do not bear initial or contingent deferred sales charges or ongoing 12b-1 service and distribution fees, but Class P and Class P2 shares held through advisory programs may be subject to a program fee, which, if included, would have reduced performance.
- ⁴ Inception date is November 14, 2022.
- ⁵ The FTSE 3-Month U.S. Treasury Bill Index is an unmanaged index reflecting monthly return equivalents of yield averages that are not marked to the market and an average of the last three 3-month T-bill month-end rates. 3-month T-bills are the short-term debt obligations of the US government. Investors should note that indices do not reflect the deduction of fees and expenses. Inception return for the Index is for the 10 years ended.
- ⁶ The Bloomberg Global Aggregate Index is an unmanaged broad-based, market capitalization-weighted index which is designed to measure the broad investment-grade global fixed income markets for US and non-US government, government-related, corporate and securitized sectors. Investors should note that indices do not reflect the deduction of fees and expenses. Inception return for the Index is for the 10 years ended.
- ⁷ The MSCI World Index net (USD) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. Net total return indices reinvest dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The index is constructed and managed with a view to being fully investable from the perspective of international institutional investors. Investors should note that indices do not reflect the deduction of fees and expenses. Inception return for the Index is for the 10 years ended.

The HFRI Fund of Funds Composite Index is an index of Fund of Funds strategies which invest with multiple managers through funds or managed accounts. The strategy designs a diversified portfolio of managers with the objective of significantly lowering the risk (volatility) of vesting with an individual manager. The Fund of Funds manager has discretion in choosing which strategies to invest in for the portfolio. A manager may allocate funds to numerous managers within a single strategy, or with numerous managers in multiple strategies. The minimum investment in a Fund of Funds may be lower than an investment in an individual hedge fund or managed account. The investor has the advantage of diversification among managers and styles with significantly less capital than investing with separate managers. Investors should note that indices do not reflect the deduction of fees and expenses. Inception return for the Index is for the 10 years ended.

N/A = Not applicable.

Prior to August 3, 2015, a 1% redemption fee was imposed on sales or exchanges of any class of shares of the Portfolio made during the specified holding period.

Past performance does not predict future performance, and the performance information provided does not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares. The return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance results assume reinvestment of all dividends and capital gain distributions at net asset value on the ex-dividend dates. Total returns for periods of less than one year have not been annualized. Current performance may be higher or lower than the performance data quoted. For month-end performance figures, please visit www.ubs.com/us/en/assetmanagement/funds/mutual-fund-performance.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of January 31, 2024 in valuing the Portfolio's investments. In the event a Portfolio holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments:

Assets Description	Unadjusted quoted prices in active market for identical investments (Level 1)	Other significant observable inputs (Level 2)	Unobservable inputs (Level 3)	Total
Corporate bonds	\$ —	\$ 43,126,989	\$-	\$ 43,126,989
Common stocks	117,235,839	26,404,968	_	143,640,807
Preferred stocks	_	183,695	_	183,695
Exchange traded funds	1,991,075	_	_	1,991,075
Investment companies	35,701,856	_	_	35,701,856
Warrant		_	_	_
Short-term investments	_	108,677,330	_	108,677,330

Preferred stocks	_	(168,393)	_	(168,393)
Options written	(1,447,979)	_	_	(1,447,979)
Swaptions written	_	(4,671)	_	(4,671)
Futures contracts	(8,663)	(160,062)	_	(168,725)
Swap agreements		(3,070,894)	_	(3,070,894)
Forward foreign currency contracts	_	(518,865)	_	(518,865)
Total	\$(90,741,907)	\$(13,151,711)	\$—	\$(103,893,618)

At January 31, 2024, there were no transfers in or out of Level 3.

Securities valued using unobservable inputs, i.e. Level 3, were not considered significant to the Fund.

Portfolio footnotes

- [†] Amount represents less than 0.05% or (0.05)%.
- * Non-income producing security.
- ¹ Security, or portion thereof, pledged as collateral for investments sold short, written options, futures and/or swap agreements.
- ² Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities are considered liquid, unless noted otherwise, and may be resold in transactions exempt from registrations, normally to qualified institutional buyers. Securities exempt from registration pursuant to Rule 144A, in the amount of \$6,056,566, represented 1.7% of the Portfolios net assets at period end.
- ³ In U.S. dollars unless otherwise indicated.
- ⁴ Bond interest in default.
- ⁵ If the Portfolios is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Portfolios will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced obligation or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced obligation.
- ⁶ Payments made or received are based on the notional amount.

Understanding your Portfolio's expenses (unaudited)

As a shareholder of a Portfolio, you incur two types of costs: (1) transactional costs (as applicable), including sales charges (loads), or ongoing program fees; and (2) ongoing Portfolio costs, including management fees; service and/or distribution (12b-1) fees (if applicable); and other Portfolio expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in each Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples below are based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, August 1, 2023 to January 31, 2024.

Actual expenses (unaudited)

The first line for each class of shares in the table below for each Portfolio provides information about its actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over a period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for each class of shares for each respective Portfolio under the heading entitled "Expenses paid during period" to estimate the expenses you paid on your account during the period.

Hypothetical example for comparison purposes (unaudited)

The second line for each class of shares in the table below for each Portfolio provides information about hypothetical account values and hypothetical expenses based on that Portfolio's actual expense ratios for each class of shares and an assumed rate of return of 5% per year before expenses, which is not that Portfolio's actual return for each class of shares. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing Portfolio costs only and do not reflect any transactional costs (as applicable), such as sales charges (loads), or program fees. Therefore, the second line in the table for each class of shares for each Portfolio is useful in comparing ongoing Portfolio costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs or program fees were included, your costs would have been higher.

¹ Amount represents less than \$0.0005 or \$(0.0005) per share.

² Total investment return is calculated assuming a \$10,000 investment on the first day of each period reported, reinvestment of all dividends and other distributions, if any, at net asset value on the payable dates, and a sale at net asset value on the last day of each period reported. The figures do not include program fees; results would be lower if these were included. Total investment return for the period of less than one year has not been annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions.

³ Annualized.

² Total investment return is calculated assuming a \$10,000 investment on the first day of each period reported, reinvestment of all dividends and other distributions, if any, at net asset value on the ex-dividend dates, and a sale at net asset value on the last day of each period reported. The figures do not include any applicable sales charges, redemption fees or program fees; results would be lower if they were included. Total investment return for the periods of less than one year has not been annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.

³ Annualized

⁴ Includes interest expense representing less than 0.005%.

2019

¹ For the period from September 15, 2021 (commencement of operations) through July 31, 2022.

² Calculated using the average shares method.

³ Total investment return is calculated assuming a \$10,000 investment on the first day of each period reported, reinvestment of all dividends and other distributions, if any, at net asset value on the ex-dividend dates, and a sale at net asset value on the last day of each period reported. The figures do not include any applicable sales charges, redemption fees or program fees; results would be lower if they were included. Total investment return for the periods of less than one year has not been annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.

Expenses after fee waivers and/or expense reimbursements/ recoupments Net investment income (loss)	1.04% ³ 0.75% ³	1.04% 0.66%	0.98% 0.45%	1.00% 0.29%	1.04% ⁴ 0.77%	0.94% ⁴ 0.79%
Supplemental data: Net assets, end of period (000's) Portfolio turnover	\$106 61%	\$122 36%	\$143 37%	\$153 50%	\$105 59%	\$178 68%

¹ Calculated using the average shares method.

² Total investment return is calculated assuming a \$10,000 investment on the first day of each period reported, reinvestment of all dividends and other distributions, if any, at net asset value on the ex-dividend dates, and a sale at net asset value on the last day of each period reported. The figures do not include any applicable sales charges, redemption fees or program fees; results would be lower if they were included. Total investment return for the periods of less than one year has not been annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.

See accompanying notes to financial statements

² Total investment return is calculated assuming a \$10,000 investment on the first day of each period reported, reinvestment of all dividends and other distributions, if any, at net asset value on the ex-dividend dates, and a sale at net asset value on the last day of each period reported. The figures do not include any applicable sales charges, redemption fees or program fees; results would be lower if they were included. Total investment return for the periods of less than one year has not been annualized. Returns do not reflect the deduction of taxes that a shareholder would pay on Portfolio distributions or the redemption of Portfolio shares.

³ Annualized

⁴ Includes interest expense representing less than 0.005%.

PACE Select Advisors Trust Notes to financial statements (unaudited)

Organization and significant accounting policies

PACE Select Advisors Trust (the "Trust") is an open-end management investment company registered with the US Securities and Exchange Commission ("SEC") under the Investment Company Act of 1940, as amended (the "1940 Act"), currently offering multiple series representing separate investment portfolios. The Trust is a Delaware statutory trust organized under the laws of the State of Delaware by Certificate of Trust dated September 9, 1994, as amended June 9, 1995 and thereafter. The trustees of the Trust have authority to issue an unlimited number of shares of beneficial interest at par value of \$0.001 per share.

The Trust has fifteen series available for investment, each having its own investment objectives and policies: UBS Government Money Market Investments Fund, PACE Mortgage-Backed Securities Fixed Income Investments, PACE Intermediate Fixed Income Investments, PACE Strategic Fixed Income Investments, PACE Municipal Fixed Income Investments, PACE Global Fixed Income Investments, PACE High Yield Investments, PACE Large Co Value Equity Investments, PACE Small/Medium Co Value Equity Investments, PACE Small/Medium Co Growth Equity Investments, PACE International Equity Investments, PACE International Emerging Markets Equity Investments, PACE Global Real Estate Securities Investments and PACE Alternative Strategies Investments (each a "Portfolio" and collectively, the "Portfolios"). Each of the Portfolios is classified as a diversified investment company for purposes of the 1940 Act.

UBS Asset Management (Americas) LLC ("UBS AM") serves as the investment manager and administrator for the Portfolios and also as the investment advisor for UBS Government Money Market Investments Fund and a portion of PACE Alternative Strategies Investments' assets. Subject to the approval and oversight of the Portfolios' Board of Trustees (the "Board"), UBS AM selects and oversees other investment subadvisors, who provide advisory services for the Portfolios. UBS Asset Management (US) Inc. ("UBS AM (US)") serves as principal underwriter for the Portfolios. UBS AM and UBS AM (US) are indirect wholly owned subsidiaries of UBS Group AG. UBS Group AG is an internationally diversified organization with headquarters in Zurich, Switzerland. UBS Group AG operates in many areas of the financial services industry.

Each Portfolio currently offers Class A, Class Y, Class P, and Class P2 shares, with the exception of UBS Government Money Market Investments Fund, which currently offers Class P shares only, and PACE Global Real Estate Securities Investments, which only has Class A, Class P, and Class P2 shares. Each class represents interests in the same assets of the applicable Portfolio and the classes are identical except for differences in their sales charge structures, ongoing service and distribution charges certain transfer agency and related services expenses and class specific fee/expense waiver arrangements. All classes of shares have equal voting privileges except that each class has exclusive voting rights with respect to its service and/or distribution plan, if any. Class Y, Class P and Class P2 shares have no service or distribution plan. The Portfolios' Class P shares currently are available for purchase only to participants in the PACESM Select Advisors Program and certain other advisory programs offered through select sponsors, except that UBS Government Money Market Investments Fund shares are also available to participants in the PACESM Multi Advisor Program. Class P2 shares are only available for purchase by a limited group of investors, including on behalf of certain investors of a fee-based program or other advisory programs in which UBS AM exercises investment discretion and for which such investors pay UBS AM a fee, or pay an affiliate of UBS AM a fee, and UBS AM receives compensation, to participate in such programs; on behalf of institutional clients with which UBS AM or its affiliates has signed a separate investment management agreement, pursuant to which such investors pay an advisory fee; and by other registered investment companies managed by UBS AM that pay a management fee at the investing/acquiring fund level.

The Trust accounts separately for the assets, liabilities and operations of each Portfolio. Expenses directly attributable to each Portfolio are charged to that Portfolio's operations; expenses which are applicable to all Portfolios are allocated among them on a pro rata basis.

PACE Select Advisors Trust Notes to financial statements (unaudited)

In the normal course of business, the Portfolios may enter into contracts that contain a variety of representations that provide indemnification for certain liabilities. The Portfolios' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolios that have not yet occurred. However, the Portfolios have not had any prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

UBS Government Money Market Investments Fund attempts to maintain a stable net asset value of \$1.00 per share. There is no assurance, however, that the Portfolio will be able to maintain a stable net asset value of \$1.00 per share. The Portfolio has adopted certain investment, portfolio valuation and dividend/distribution policies in an attempt to enable it to do so. The Portfolio has adopted a policy to operate as a "government money market fund" and as such the Portfolio is permitted to seek to maintain a stable price per share. In addition, by operating as a "government money market fund", the Portfolio is exempt from requirements that permit the imposition of a liquidity fee and/or temporary redemption gates. While the Portfolio's Board may elect to subject the Portfolio to liquidity fee and gate requirements in the future, the Board has not elected to do so at this time.

The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") is the exclusive reference of authoritative US generally accepted accounting principles ("US GAAP") recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the SEC under authority of federal laws are also sources of authoritative US GAAP for SEC registrants. The Portfolios' financial statements are prepared in accordance with US GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

In December 2022, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2022-06 ("ASU 2022-06"), "Reference Rate Reform (Topic 848)". ASU 2022-06 is an update of ASU 2020-04, which is in response to concerns about structural risks of interbank offered rates, and particularly the risk of cessation of LIBOR, regulators have undertaken reference rate reform initiatives to identify alternative reference rates that are more observable or transaction based and less susceptible to manipulation. ASU 2020-04 provides optional guidance for a limited period of time to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. ASU 2020-04 is elective and applies to all entities, subject to meeting certain criteria, that have contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. The ASU 2022-06 update clarifies that certain optional expedients and exceptions in Topic 848 for contract modifications and hedge accounting apply to derivatives that are affected by the discounting transition. The amendments in this update are effective immediately through December 31, 2024, for all entities. Management does not expect ASU 2022-06 to have a material impact on the financial statements.

In October 2022, the SEC adopted the Tailored Shareholder Reports for Mutual Funds and Exchange-Traded Funds rule and reform amendments requiring open-end management investment companies, including mutual funds and exchange-traded funds, to transmit concise and visually engaging semi-annual and annual tailored shareholder reports that highlight key information, including fund expenses, performance, and holdings to shareholders. Certain information from the Fund's current shareholder reports, including the Fund's investment portfolio, financial statements and financial highlights, will move to Form N-CSR. This information will be available online, mailed upon request and filed on a semiannual basis. The rule and form amendments have a compliance date of July 24, 2024. Accordingly, the rule and form amendments will not impact the Portfolios until the 2024 annual shareholder report.

The following is a summary of significant accounting policies:

Investment transactions, investment income and expenses—Investment transactions are recorded on the trade date. Realized gains and losses from investment transactions and foreign exchange transactions are calculated using the identified cost method. Dividend income and expense are recorded net of withholding taxes on the ex-dividend

date ("ex-date") except in the case of certain dividends from foreign securities which are recorded as soon after the ex-date as the respective Portfolio, using reasonable diligence, becomes aware of such dividends. Interest income is recorded on an accrual basis. Discounts are accreted and premiums are amortized as adjustments to interest income and the identified cost of investments.

Income, expenses (excluding class-specific expenses) and realized/unrealized gains/losses are allocated proportionately to each class of shares based upon the relative net asset value of outstanding shares (or the value of dividend eligible shares, as appropriate) of each class at the beginning of the day after adjusting for current capital share activity of the respective classes. Class specific expenses are charged directly to the applicable class of shares.

Dividends and distributions—Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends from net investment income and distributions from net realized capital gains and/or return of capital are determined in accordance with US federal income tax regulations, which may differ from US GAAP. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification.

Foreign currency translation—The books and records of the Portfolios are maintained in US dollars. Foreign currency amounts are translated into US dollars as follows: (1) the foreign currency market value of investment securities and other assets and liabilities stated in foreign currencies are translated into US dollars based on the current exchange rates each business day; and (2) purchases and sales of investment securities and income and expenses are translated at the rate of exchange prevailing on the respective dates of such transactions. The resulting exchange gains and losses are included in the Statement of operations.

The Portfolios do not generally isolate the effect of fluctuations in foreign exchange rates from the effect of the changes in the market prices of securities. However, the Portfolios do isolate the effect of fluctuations in foreign exchange rates when determining the realized gain or loss upon the sale or maturity of foreign currency-denominated securities pursuant to US federal income tax regulations. Net realized foreign currency transaction gain (loss) is treated as ordinary income (loss) for income tax reporting purposes.

Concentration of risk—Investing in securities of foreign issuers and currency transactions may involve certain considerations and risks not typically associated with investments in the United States. These risks include revaluation of currencies, adverse fluctuations in foreign currency values and possible adverse political, social and economic developments, including those particular to a specific industry, country or region, which could cause the securities and their markets to be less liquid and prices more volatile than those of comparable US companies and US government securities. These risks are greater with respect to securities of issuers located in emerging market countries in which some Portfolios in the Trust invest.

Small capitalization ("small cap") companies may be more vulnerable than larger capitalization ("large cap") companies to adverse business or economic developments. Small cap companies may also have limited product lines, markets or financial resources, and may be dependent on a relatively small management group. Securities of such companies may be less liquid and more volatile than securities of large cap companies or the market averages in general and therefore may involve greater risk than investing in large cap companies. In addition, small cap companies may not be well-known to the investing public, may not have institutional ownership and may have only cyclical, static or moderate growth prospects.

The ability of the issuers of debt securities held by the Portfolios' to meet their obligations may be affected by economic, political and other developments particular to a specific industry, country, state or region.

Investments in bonds with ratings of BB (Standard & Poor's Financial Services LLC or Fitch Ratings, Inc.) or Ba (Moody's Investors Service, Inc.) or below (commonly referred to as "high yield" bonds), or deemed of equivalent quality, have an increased risk of defaulting or otherwise being unable to honor a financial obligation. These securities are considered to be predominantly speculative with respect to an issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations. Lower-quality bonds are more likely to be subject to an issuer's default or downgrade than investment grade (higher-quality) bonds.

Many financial instruments, financings or other transactions to which a Portfolio may be a party use or may use a floating rate based on the London Interbank Offered Rate ("LIBOR"). LIBOR is widely used in financial markets. In July 2017, the United Kingdom's financial regulatory body announced that after 2021 it will cease its active encouragement cease to be published or utilized after that time. Various financial industry groups have begun planning for PACE Select Advisors Trust that transition, but the effect of the transition process and its ultimate success cannot yet be determined. The transition process may lead to increased volatility and illiquidity in markets for instruments the terms of which are based on LIBOR. It could also lead to a reduction in the value of some LIBOR-based investments and reduce the effectiveness of new hedges placed against existing LIBOR-based investments. Since the usefulness of LIBOR as a benchmark could deteriorate during the transition period. The willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments also remains uncertain. Any of these factors may adversely affect a Portfolio's performance or NAV. Certain LIBOR tenors were discontinued by the end of 2021, while the discontinuation of others have been extended to December 2024.

At January 31, 2024, PACE Global Fixed Income Investments, PACE Strategic Fixed Income Investments, PACE International Equity Investments, PACE International Emerging Markets Equity Investments and PACE Alternative Strategies Investments had exposure to Russian or Ukrainian securities. Such exposure was limited to less than 1% of each such Portfolio's assets as of such date, with the exception of PACE International Emerging Markets Equity Investments. PACE International Emerging Markets Equity Investments had 3.8% of its assets in such securities as of January 31, 2022, which holdings were subsequently sold or declined in value to represent under 1% of that Portfolio's assets. The escalating conflict between Ukraine and the Russian Federation, especially after Russia invaded Ukraine in March 2022, has resulted in significant volatility and uncertainty in financial markets. NATO, EU and G7 member countries have imposed severe and coordinated sanctions against Russia. Restrictive measures have also been imposed by Russia, and some securities traded in that country have materially declined in value and/or may no longer be tradable. These actions have resulted in significant disruptions to investing activities and businesses with operations in Russia. The longer-term impact to geopolitical norms, supply chains and investment valuations is uncertain.

Valuation of investments

Each Portfolio generally calculates its net asset value on days that the New York Stock Exchange ("NYSE") is open. A Portfolio calculates net asset value separately for each class as of the close of regular trading on the NYSE (generally, 4:00 p.m., Eastern time). The NYSE normally is not open, and the Portfolios do not price their shares, on most national holidays and Good Friday. To the extent that a Portfolio's assets are traded in other markets on days when the NYSE is not open, the value of a Portfolio's assets may be affected on those days. If trading on the NYSE is halted for the day before 4:00 p.m., Eastern Time, a Portfolio's net asset value per share generally will still be calculated as of the close of regular trading on the NYSE. The time at which a Portfolio calculates its net asset value and until which purchase, sale or exchange orders are accepted may be changed as permitted by the SEC.

Under Rule 2a-7 under the 1940 Act, as amended ("Rule 2a-7"), UBS Government Money Market Investments Fund has adopted a policy to operate as a "government money market fund". Under Rule 2a-7, a "government money market fund" invests 99.5% or more of its total assets in cash, government securities, and/or repurchase agreements that are collateralized fully (i.e., collateralized by cash and/or government securities). As a "government money market fund", UBS Government Money Market Investments Fund values its investments at amortized cost unless the Portfolio's Board determines that this does not represent fair value. Periodic review and monitoring of the valuation

of the securities held by the Portfolio is performed in an effort to ensure that amortized cost approximates market value.

Each Portfolio (other than UBS Government Money Market Investments Fund) calculates its net asset value based on the current market value, where available, for its Portfolio investments. The Portfolios normally obtain market values for their investments from independent pricing sources and broker-dealers. Independent pricing sources may use reported last sale prices, official market closing prices, current market quotations or valuations from computerized "evaluation" systems that derive values based on comparable investments. An evaluation system incorporates parameters such as security quality, maturity and coupon, and/ or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio investments. Investments also may be valued based on appraisals derived from information concerning the investment or similar investments received from recognized dealers in those holdings.

Investments traded in the over-the-counter ("OTC") market and listed on The NASDAQ Stock Market, Inc. ("NASDAQ") normally are valued at the NASDAQ Official Closing Price. Other OTC securities are valued at the last bid price on the valuation date available prior to valuation. Investments which are listed on US and foreign stock exchanges normally are valued at the market closing price, the last sale price on the day the securities are valued or, lacking any sales on such day, at the last available bid price. Investments listed on foreign stock exchanges may be fair valued based on significant events that have occurred subsequent to the close of the foreign markets. In cases where investments are traded on more than one exchange, the investments are valued on the exchange designated as the primary market by UBS AM. If a market value is not readily available from an independent pricing source for a particular investment, that investment is valued at fair value as determined in good faith by or under the direction of the Board. Foreign currency exchange rates are generally determined as of the close of the NYSE.

Certain investments in which the Portfolios invest are traded in markets that close before 4:00 p.m., Eastern time. Normally, developments that occur between the close of the foreign markets and 4:00 p.m., Eastern time, will not be reflected in a Portfolio's net asset value. However, if any of the Portfolios determine that such developments are so significant that they will materially affect the value of the Portfolio's investments, the Portfolio may adjust the previous closing prices to reflect what is believed to be the fair value of these investments as of 4:00 p.m., Eastern time.

Certain Portfolios may use a systematic fair valuation model provided by an independent third party to value investments principally traded in foreign markets in order to adjust for possible stale pricing that may occur between the close of the foreign exchanges and the time for valuation. The systematic fair valuation model may use calculations based on indices of domestic securities and other appropriate indicators, such as prices of relevant ADRs and futures contracts. If an investment is valued at "fair value," that value is likely to be different from the last quoted market price for the investment. The use of the fair valuation model may result in securities being transferred between Level 1 and Level 2 of the fair valuation hierarchy at the end of the reporting period.

The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with 60 days or less remaining to maturity, unless the Board determines that this does not represent fair value.

Investments in open-end investment companies are valued at the daily closing net asset value of the respective investment company. Pursuant to the Portfolios' use of the practical expedient within ASC Topic 820, Fair Value Measurement, investments in investment companies without publicly published prices are also valued at the daily net asset value.

All investments quoted in foreign currencies are valued daily in US dollars on the basis of the foreign currency exchange rates prevailing at the time.

Futures contracts are generally valued at the settlement price established each day on the exchange on which they are traded. Forward foreign currency contracts are valued daily using forward exchange rates quoted by independent pricing services.

OTC swaps are marked-to-market daily based upon values from third party vendors or quotations from market makers to the extent available. In the event that market quotations are not readily available or deemed unreliable, the swap is valued at fair value as determined in good faith by or under the direction of the Board. Centrally cleared swaps are valued using prices from the clearing houses.

The Board has designated UBS AM as the valuation designee pursuant to Rule 2a-5 under the 1940 Act, and delegated to UBS AM the responsibility for making fair value determinations with respect to portfolio holdings. UBS AM as the valuation designee, is responsible for periodically assessing any material risks associated with the determination of the fair value of investments; establishing and applying fair value methodologies; testing the appropriateness of fair value methodologies; and overseeing and evaluating third-party pricing services. UBS AM has the Equities, Fixed Income, and Multi-Asset Valuation Committee (the "VC") to assist with its designated responsibilities as valuation designee with respect to the Portfolios' portfolio holdings. The VC is comprised of representatives of management. The VC provides reports to the Board at each quarterly meeting regarding any investments that have been fair valued, valued pursuant to standing instructions approved by the VC, or where non-vendor pricing sources had been used to make fair value determinations when sufficient information exists during the prior quarter. Fair valuation determinations are subject to review at least monthly by the VC during scheduled meetings. Pricing decisions, processes, and controls over fair value determinations are subject to internal and external reviews, including annual internal compliance reviews and periodic internal audit reviews.

The types of investments for which such fair value pricing may be necessary include, but are not limited to: foreign investments under some circumstances; securities of an issuer that has entered into a restructuring; investments whose trading has been halted or suspended; fixed income securities that are in default and for which there is no current market value quotation; and investments that are restricted as to transfer or resale. The need to fair value a Portfolio's Portfolio investments may also result from low trading volume in foreign markets or thinly traded domestic investments, and when a security that is subject to a trading limit or collar on the exchange or market on which it is primarily traded reaches the "limit up" or "limit down" price and no trading has taken place at that price. Various factors may be reviewed in order to make a good faith determination of an investment's fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on disposition of the investment; and the evaluation of forces which influence the market in which the investment is purchased and sold. Valuing investments at fair value involves greater reliance on judgment than valuing investments that have readily available market quotations. Fair value determinations can also involve reliance on quantitative models employed by a fair value pricing service.

US GAAP requires disclosure regarding the various inputs that are used in determining the value of each Portfolio's investments. These inputs are summarized into the three broad levels listed below:

Level 1—Unadjusted quoted prices in active markets for identical investments.

Level 2—Other significant observable inputs, including but not limited to, quoted prices for similar investments, interest rates, prepayment speeds and credit risks.

Level 3—Unobservable inputs inclusive of each Portfolio's own assumptions in determining the fair value of investments.

A fair value hierarchy table has been included near the end of each Portfolio's Portfolio of investments.

Investments

Asset-backed securities—Certain Portfolios may invest in asset-backed securities ("ABS"), representing interests in pools of certain types of underlying installment loans, home equity loans, leases of various types of real and personal property and receivables from revolving lines of credit (credit cards). Such assets are securitized through the use of trusts or special purpose corporations. The yield characteristics of ABS differ from those of traditional debt securities. One such major difference is that principal may be prepaid at any time because the underlying obligations generally may be prepaid at any time. ABS may decrease in value as a result of increases in interest rates and may benefit less than other fixed-income securities from declining interest rates because of the risk of prepayment.

Loan assignments and participations—Certain Portfolios may invest in secured or unsecured fixed or floating rate loans ("Loans") arranged through private negotiations between a borrowing corporation, government or other entity and one or more financial institutions ("Lenders") which may be in the form of participations ("Participations") in Loans or assignments ("Assignments") of all or a portion of Loans from third parties. A Portfolio may invest in multiple series or tranches of a Loan, which may have varying terms and carry different associated risks. Participations typically result in a Portfolio having a contractual relationship only with the Lender, not with the borrower. A Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the Participation and only upon receipt by the Lender of the payments from the borrower. In connection with purchasing Participations, a Portfolio generally has no direct right to enforce compliance by the borrower with the terms of the loan agreement relating to the Loan, or any rights of set-off against the borrower, and a Portfolio may not directly benefit from any collateral supporting the Loan in which it has purchased the Participation. As a result, a Portfolio assumes the credit risk of both the borrower and the Lender that is selling the Participation. In the event of the insolvency of the selling Lender, the Portfolio may be treated as a general creditor of that Lender and may not benefit from any set-off between the Lender and the borrower. A Portfolio will acquire Participations only if its subadvisor determines that the selling Lender is creditworthy. When a Portfolio purchases Assignments from Lenders, it acquires direct rights against the borrower on the Loan. In an Assignment, the Portfolio is entitled to receive payments directly from the borrower and, therefore, does not depend on the selling bank to pass these payments onto the Portfolio However, because Assignments are arranged through private negotiations between potential assignees and assignors, the rights and obligations acquired by a Portfolio as the purchaser of an Assignment may differ from, and be more limited than, those held by the assigning Lender.

Mortgage-backed securities—Certain Portfolios may invest in mortgage-backed securities ("MBS"), representing direct or indirect interests in pools of underlying mortgage loans that are secured by real property. These securities provide investors with payments consisting of both principal and interest as the mortgages in the underlying mortgage pools are paid.

The timely payment of principal and interest (but not the market value) on MBS issued or guaranteed by Ginnie Mae (formally known as the Government National Mortgage Association or GNMA) is backed by Ginnie Mae and the full faith and credit of the US government. Obligations issued by Fannie Mae (formally known as the Federal National Mortgage Association or FNMA) and Freddie Mac (formally known as the Federal Home Loan Mortgage Company or FHLMC) are historically supported only by the credit of the issuer, but currently are guaranteed by the US government in connection with such agencies being placed temporarily into conservatorship by the US government.

Some MBS are sponsored or issued by private entities. Payments of principal and interest (but not the market value) of such private MBS may be supported by pools of mortgage loans or other MBS that are guaranteed, directly or indirectly, by the US government or one of its agencies or instrumentalities, or they may be issued without any government guarantee of the underlying mortgage assets but with some form of non-government credit enhancement.

Collateralized mortgage obligations ("CMO") are a type of MBS. A CMO is a debt security that may be collateralized by whole mortgage loans or mortgage pass-through securities. The mortgage loans or mortgage pass-through securities are divided into classes or tranches with each class having its own characteristics. Investors typically receive payments out of the interest and principal on the underlying mortgages. The portions of these payments that investors receive, as well as the priority of their rights to receive payments, are determined by the specific terms of the CMO class.

The yield characteristics of MBS differ from those of traditional debt securities. Among the major differences are that interest and principal payments are made more frequently, usually monthly, and that principal may be prepaid at any time because the underlying mortgage loans or other obligations generally may be prepaid at any time. Prepayments on a pool of mortgage loans are influenced by a variety of economic, geographic, social and other factors. Generally, prepayments on fixed-rate mortgage loans will increase during a period of falling interest rates and decrease during a period of rising interest rates. Certain classes of CMOs and other MBS are structured in a manner that makes them extremely sensitive to changes in prepayment rates. Such classes include interest-only ("IO") and principal-only ("PO") classes. IOs are entitled to receive all or a portion of the interest, but none (or only a nominal amount) of the principal payments, from the underlying mortgage assets. If the mortgage assets underlying an IO experience greater than anticipated principal prepayments, then the total amount of interest payments allocable to the IO class, and therefore the yield to investors, generally will be reduced. Conversely, PO classes are entitled to receive all or a portion of the principal payments, but none of the interest, from the underlying mortgage assets. PO classes are purchased at substantial discounts from par, and the yield to investors will be reduced if principal payments are slower than expected.

Real estate investment trusts—Certain Portfolios may invest in real estate investment trusts ("REITs"). Distributions from a REIT are initially recorded as dividend income and may subsequently be recharacterized by the REIT at the end of its tax year as a return of capital and/or capital gains. The Portfolio estimates the character of dividends received from REITs for financial reporting purposes based on the distribution history of each REIT. Once actual distribution characterizations are made available by the REITs, typically after calendar year end, the Portfolio updates its accounting and/or tax books and records.

Repurchase agreements—The Portfolios may purchase securities or other obligations from a bank or securities dealer (or its affiliate), subject to the seller's agreement to repurchase them at an agreed upon date (or upon demand) and price. The Portfolios maintains custody of the underlying obligations prior to their repurchase, either through their regular custodian or through a special "tri-party" custodian or sub-custodian that maintains a separate account for both the Portfolios and their counterparty. The underlying collateral is valued daily in an effort to ensure that the value, including accrued interest, is at least equal to the repurchase price. Certain Portfolios obtain securities on terms that allow it to resell or repledge the securities to others.

Repurchase agreements carry certain risks not associated with direct investments in securities, including a possible decline in the market value of the underlying obligations. If their value becomes less than the repurchase price, plus any agreed-upon additional amount, the counterparty must provide additional collateral so that the collateral is at least equal to the repurchase price plus any agreed-upon additional amount. The difference between the total amount to be received upon repurchase of the obligations and the price that was paid by a Portfolios upon acquisition is accrued as interest and included in its net investment income. In the event of default of the obligation to repurchase, the Portfolios generally have the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. Repurchase agreements involving obligations other than US government securities (such as commercial paper, corporate bonds, equities and mortgage loans) may be subject to special risks and may not have the benefit of certain protections in the event of counterparty insolvency. Moreover, repurchase agreements secured by obligations that are not eligible for direct investment under Rule 2a-7 or a Portfolio's investment strategies and limitations, may require the Portfolios to promptly dispose of such collateral if the seller or guarantor becomes insolvent. If the seller (or seller's quarantor, if any) becomes insolvent, the Portfolios may suffer delays, costs and possible losses in

connection with the disposition or retention of the collateral. Under certain circumstances, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings. Each Portfolios intends to enter into repurchase agreements only in transactions with counterparties believed by UBS AM and the applicable subadvisor to present minimal credit risks.

Each Portfolio Portfolios may participate in joint repurchase agreement transactions with other Portfolios's managed, advised or sub-advised by UBS AM. Under certain circumstances, the Portfolios may engage in a repurchase agreement transaction with a yield of zero in order to invest cash amounts remaining in its Portfolios at the end of the day in order to avoid having the Portfolios potentially exposed to a fee for uninvested cash held in a business account at a bank.

Restricted securities—The Portfolios may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included in Portfolio's portfolio footnotes.

Reverse repurchase agreements—Certain Portfolios may enter into reverse repurchase agreements with qualified third party banks, securities dealers or their affiliates. Interest on the value of reverse repurchase agreements issued and outstanding is based upon competitive market rates at the time of issuance. At the time a Portfolio enters into a reverse repurchase agreement, the Portfolio establishes and maintains a segregated account with the Portfolio's custodian containing liquid securities having a value not less than the repurchase price, including accrued interest, of the reverse repurchase agreement.

During the period ended January 31, 2024, only PACE Mortgage-Backed Securities Fixed Income Investments utilized reverse repurchase agreement transactions.

The table below represents the remaining contractual maturity as of January 31, 2024, of the reverse repurchase agreement transactions accounted for as secured borrowings.

PACE Mortgage-Backed Securities Fixed Income Investments							
	Overnight and			Greater than			
Type of securities being bought back	continuous	Up to 30 days	31-90 days	90 days	Total		
Reverse repurchase agreements	\$—	\$31,400,490	\$—	\$—	\$31,400,490		

Securities traded on to-be-announced basis—Certain Portfolios may from time to time purchase, or short sell, securities on a to-be-announced ("TBA") basis. In a TBA transaction, the Portfolio commits to purchasing securities for which all specific information is not yet known at the time of the trade, particularly the face amount and maturity date of the underlying securities. Securities purchased on a TBA basis are not settled until they are delivered to the Portfolio, normally 15 to 45 days later. Beginning on the date the Portfolio enters into a TBA transaction, cash, U.S. government securities or other liquid securities are segregated in an amount equal in value to the purchase price of the TBA security. These transactions are subject to market fluctuations and their current value is determined in the same manner as for other securities.

Short sales "against the box"—Each Portfolio (other than UBS Government Money Market Investments Fund and PACE Municipal Fixed Income Investments) may engage in short sale transactions of securities it owns or has the right to acquire at no added cost through conversion or exchange of other securities it owns (short sales "against the box"). A Portfolio might make a short sale "against the box" to hedge against market risks when its subadvisor believes that the price of a security may decline, thereby causing a decline in the value of a security owned by the Portfolio.

The Portfolio must borrow the security to make delivery to the buyer. The initial amount of a short sale is recorded as a liability which is marked to market daily. Fluctuations in the value of this liability are recorded as unrealized appreciation or depreciation on the Statement of operations. Any loss in the Portfolio's long position after the short sale should be reduced by a corresponding gain in the short position. Conversely, any gain in the long position after the short sale should be reduced by a corresponding loss in the short position. When a Portfolio sells short, it establishes a margin account with the broker effecting the short sale and deposits collateral with the broker. In addition, the Portfolios maintains, in a segregated account with its custodian, the securities that could be used to cover the short sale. Each Portfolio incurs transaction costs, including dividend expense, borrowing costs and interest expense, in connection with opening, maintaining and closing short sales "against the box". These dividends and interest are booked as an expense or liability to the Portfolio.

Treasury Inflation Protected Securities—The Portfolios may purchase Treasury inflation protected securities ("TIPS") which are debt securities issued by the US Treasury. TIPS adjust for inflation based on changes in the published Consumer Price Index ("CPI"). During periods of inflation when the CPI index increases, the principal amount of the debt to which the rate of interest is applied increases, which in turn increases the yield. During periods of deflation when the CPI index decreases, the principal amount of the debt to which the rate of interest is applied decreases, which in turn lowers the yield. At maturity, TIPS return the higher of the principal amount at maturity or the initial face amount of the debt.

Treasury roll transactions—Certain Portfolios may enter into treasury roll transactions. In a treasury roll transaction, a Portfolio sells a Treasury security to a counterparty with a simultaneous agreement to repurchase the same security at an agreed upon price and date. The Portfolio receives cash from the sale of the Treasury security to use for other investment purposes. For US GAAP purposes, a treasury roll transaction is accounted for as a secured borrowing and not as a purchase and sale. The difference between the sale price and repurchase price represents net interest income or net interest expense reflective of an agreed upon rate between the Portfolio and the counterparty over the term of the borrowing. The Portfolio will benefit from the transaction if the income earned on the investment purchased with the cash received in the treasury roll transaction exceeds the interest expense incurred by the Portfolio. If the interest expense exceeds the income earned, the Portfolio's net investment income and dividends to shareholders may be adversely impacted.

Treasury roll transactions involve the risk that the market value of the securities that the Portfolio is required to repurchase may decline below the agreed upon repurchase price of those securities. During the period ended January 31, 2024, only PACE Strategic Fixed Income Investments utilized treasury roll transactions.

PACE Mortgage-Backed Securities Fixed Income Investments								
	Overnight and			Greater than				
Types of securities being bought back	continuous	Up to 30 days	31-90 days	90 days	Total			
US government obligations	\$—	\$8,671,713	\$—	\$—	\$8,671,713			

PACE Strategic Fixed Income Investments					
_	Overnight and			Greater than	
Type of securities being bought back	continuous	Up to 30 days	31-90 days	90 days	Total
US government obligations	\$—	\$17,954,532	\$—	\$—	\$17,954,532

Uncovered short sales—PACE Mortgage-Backed Securities Fixed Income Investments (with respect to securities issued by the US Treasury and TBA securities coupon trades), PACE Large Co Value Equity Investments, PACE International Equity Investments, PACE Global Real Estate Securities Investments and PACE Alternative Strategies Investments may engage in short sale transactions in which the Portfolio sells a security it does not own (or does not have the right to acquire at no added cost), in anticipation of a decline in the security's price.

The Portfolio must borrow the security to make delivery to the buyer. The initial amount of a short sale is recorded as a liability which is marked to market daily. Fluctuations in the value of this liability are recorded as unrealized appreciation or depreciation on the Statement of operations. The Portfolio will realize a loss as a result of the short sale if the price of the security increases between the date of the short sale and the date on which the Portfolio replaces the borrowed security, and the Portfolio will realize a gain if the security declines in price between those same dates. Each Portfolio segregates collateral, consisting of cash or liquid assets, sufficient to collateralize the market value of the investments sold short. Each Portfolio incurs transaction costs, including dividend expense, borrowing costs and interest expenses in connection with opening, maintaining and closing short sales. These dividends and interest are booked as an expense or liability to the Portfolio.

Because a Portfolio's loss on a short sale arises from increases in the value of the investment sold short, such loss, like the potential increase in price of the security sold short, is theoretically unlimited. The Portfolio's investments held long could also decline in value at the same time the value of the investment sold short increases, thereby increasing the Portfolio's potential for loss. There is also the risk that the counterparty to a short sale transaction may fail to honor its contract terms, causing a loss to the Portfolio. In addition, PACE Large Co Value Equity Investments and PACE International Equity Investments may invest the proceeds received upon the initial sale of the security, resulting in leverage and increasing each Portfolio's return and loss potential. PACE Large Co Value Equity Investments and PACE International Equity Investments may also engage in short sale transactions that are effected through their custodian and may deliver cash received in connection with its securities lending activity to the custodian as collateral to secure the short sale transactions.

For the period ended January 31, 2024, PACE Large Co Value Equity Investments and PACE Global Real Estate Securities Investments did not engage in any short sale transactions..

Unfunded loan commitments—A Portfolio may enter into unfunded loan commitments, which are contractual obligations for future funding at the option of the borrower. Unfunded loan commitments represent a future obligation, in full, even though a percentage of the committed amount may not be utilized by the borrower. Unfunded loan commitments, and the obligation for future funding, are recorded as a liability on the Statement of assets and liabilities at par value at the time the commitment is entered into. Purchases of unfunded loan commitments may have a similar effect on the Portfolio's NAV as if the Portfolio had created a degree of leverage in the portfolio. Market risk exists with these commitments to the same extent as if the securities were owned on a settled basis. Losses may arise due to changes in the value of the unfunded loan commitments.

Under the terms of the contract, the Portfolio has the option to assign (sell) all or portion of the unfunded loan commitment. Upon the completion of such assignment, the Portfolio is released from its rights and obligations pertaining to the portion of the unfunded loan commitment assigned. When the Portfolio sells a portion of an unfunded loan commitment, the portion sold is removed from the Portfolio of investments and the unsettled amount is reflected as unfunded loan commitments sold on the Statement of assets and liabilities until settlement date. Once settled, the portion of the unfunded loan commitment assigned is relieved from the Portfolio's unfunded loan commitments liability.

Derivative instruments

Purchased options—Certain Portfolios may purchase put and call options, including, but not limited to, options on foreign or US securities, indices, foreign currencies, options on futures contracts and options on swap agreements (commonly referred to as swaptions), in order to gain exposure to or protect against changes in the markets or in an attempt to enhance income or gains. Purchasing call options tends to increase exposure to the underlying instrument. Purchasing put options tends to decrease exposure to the underlying instrument.

The Portfolios pay a premium which is included on the Statement of assets and liabilities as an investment and subsequently marked to market to reflect the current value of the option. Premiums paid for purchasing options which

expire are treated as realized losses. Purchased options are shown as portfolio holdings within the Portfolio of investments and are included in the Statement of assets and liabilities in investments, at value.

The risk associated with purchasing put and call options is limited to the premium paid. Premiums paid for purchasing options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying future, security or currency transaction to determine the realized gain or loss.

Option writing—Certain Portfolios may write (sell) put and call options, including, but not limited to, options on foreign or US securities, indices, foreign currencies, options on futures contracts and options on swap agreements (commonly referred to as swaptions), in order to gain exposure to or protect against changes in the markets or in an attempt to enhance income or gains.

When a Portfolio writes a call or a put option, an amount equal to the premium received by the Portfolio is included on the Portfolio's Statement of assets and liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. If an option which the Portfolio has written either expires on its stipulated expiration date or the Portfolio enters into a closing purchase transaction, the Portfolio realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security or derivative instrument, and the liability related to such option is extinguished. If a call option, which a Portfolio has written, is exercised, the Portfolio recognizes a realized gain or loss (long-term or short-term, depending on the holding period of the underlying security) from the sale of the underlying security or derivative instrument and the proceeds from the sale are increased by the premium originally received. If a put option, which a Portfolio has written, is exercised, the amount of the premium originally received reduces the cost of the security or derivative instrument which the Portfolio purchases upon exercise of the option.

In writing an option, a Portfolio bears the market risk of an unfavorable change in the price of the derivative instrument, security, or currency underlying the written option. Exercise of an option written by a Portfolio could result in the Portfolio selling or buying a derivative instrument, security or currency at a price different from current market value.

In the normal course of trading activities, the Portfolio trades and holds certain fair valued derivative contracts that constitute guarantees. Such contracts include written put options, where the Portfolio will be obligated to purchase securities at specified prices (i.e. the options are exercised by the counterparties). It also includes written swaptions, where the Portfolio will be obligated to enter into a swap agreement.

The maximum payout for written put options is limited to the number of put option contracts written and the related strike prices, respectively. Maximum payout amounts could be offset by the subsequent sale, if any, of assets obtained via the execution of a payout event. At January 31, 2024, PACE Mortgage-Backed Securities Fixed Income Investments and PACE Alternative Strategies Investments had maximum payout amounts of approximately \$2,813,291,000 and \$1,407,893 respectively, relating to written put option contracts.

Futures contracts—Certain Portfolios may purchase or sell futures contracts to increase or reduce their exposure to an asset class without purchasing or selling the underlying securities, either as a hedge or to enhance income or realized gains. Generally, a futures contract is a standard binding agreement to buy or sell a specified quantity of an underlying reference asset, such as a specific security or currency, at a specified price at a specified later date.

Upon entering into a futures contract, a Portfolio is required to deliver to a broker an amount of cash and/or US government securities equal to a certain percentage of the contract amount. This amount is known as the "initial margin". Subsequent payments, known as "variation margin", generally are made or received by a Portfolio, depending on the daily fluctuations in the value of the underlying futures contracts, except that in the case of certain futures

contracts that are held through swap contracts. Such variation margin is recorded for financial statement purposes on a daily basis as an unrealized appreciation or depreciation on futures until the futures contract is closed or expires, at which time the net gain or loss is reclassified to realized gain or loss on futures.

Using futures contracts involves various risks, including market, interest rate and equity risks. Risks of entering into futures contracts include the possibility that there may be an illiquid market or that a change in the value of the contract may not correlate with changes in the value of the underlying securities. To the extent that market prices move in an unexpected direction, there is a risk that a Portfolio will not achieve the anticipated benefits of the futures contract or may realize a loss.

Futures contracts, if any, are shown as fund holdings within the Portfolio of investments. Variation margin, if applicable, is shown in Variation margin receivable or payable on futures contracts within the Statement of Assets and Liabilities.

Swap agreements—Certain Portfolios may engage in swap agreements, including, but not limited to, interest rate, credit default, total return. A Portfolio expects to enter into these transactions to preserve a return or spread on a particular investment or to hedge a portion of the Portfolio's duration, to protect against any increase in the price of securities the Portfolio anticipates purchasing at a later date, to gain exposure to certain markets in the most economical way possible or in an attempt to enhance income or gains.

The Portfolios accrue for interim payments on swap agreements on a daily basis, with the net amount recorded within unrealized appreciation or depreciation of swap agreements. Once interim payments are settled in cash, the net amount is recorded as realized gain/loss on swap agreements, in addition to realized gain/loss recorded upon the termination of swap agreements on the Statement of operations. Fluctuations in the value of swap agreements are recorded for financial statement purposes as unrealized appreciation or depreciation on swap agreements.

Certain Portfolios may enter into interest rate swap agreements with another party to receive or pay interest (e.g., an exchange of fixed rate payments for floating rate payments) to protect themselves from interest rate fluctuations. This type of swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to a specified interest rate(s) for a specified amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. Interest rate swap agreements are subject to general market risk, liquidity risk, counterparty risk and interest rate risk.

Credit default swap agreements involve commitments to make or receive payments in the event of a default of a security or other credit event of the referenced obligation. As a buyer, the Portfolio would make periodic payments to the counterparty, and the Portfolio would receive payments only upon the occurrence of a default or credit event. If no default or credit event occurs, the Portfolio will lose its periodic stream of payments over the term of the contract. However, if a default or a credit event does occur, the Portfolios typically would receive full notional value for the referenced obligation that may have little or no value. As a seller, the Portfolio would receive periodic payments from the counterparty, and the Portfolios would make payments only upon the occurrence of a default or a credit event. If no default or credit event occurs, the Portfolios will gain the periodic stream of payments it received over the term of the contract and the counterparty will lose its periodic stream of payments over the term of the contract. However, if a default or credit event occurs, the Portfolio typically would pay full notional value for the referenced obligation that may have little or no value. Credit default swap agreements may involve greater risks than if the Portfolios had invested in the referenced obligation directly and are subject to general market risk, liquidity risk and credit risk.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These

indices are made up of referenced credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. A Portfolio may use credit default swap agreements on credit indices to hedge a portfolio of credit default swaps or bonds with a credit default swap on indices which is less expensive than it would be to buy many credit default swaps to achieve a similar effect. Credit default swap agreements on credit indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Credit default swap agreements on corporate issues or sovereign issues of an emerging market country involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). A Portfolio may use credit default swap agreements on corporate issues or sovereign issues of an emerging market country to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Portfolio owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default.

The maximum potential amount of future payments (undiscounted) that a Portfolio as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement, which may exceed the amount of the value reflected on the Statement of assets and liabilities. Notional amounts of all credit default swap agreements outstanding as of the period end for which a Portfolio is the seller of protection are disclosed under the section "Credit default swap agreements on corporate issues and credit indices—sell protection" in the Portfolio of investments. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into, if any, by a Portfolio for the same referenced entity or entities.

Total return swap agreements involve commitments to pay or receive interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the security or index underlying the transactions exceeds or falls short of the offsetting interest rate obligation, the Portfolio will receive a payment from or make a payment to the counterparty, respectively. Total return swap agreements are marked-to-market daily, and the change, if any, is recorded as unrealized appreciation or depreciation. Total return swap agreements are subject to general market risk, liquidity risk, counterparty risk, interest rate risk, credit risk and the risk that there may be unfavorable changes in the underlying investments or instruments.

Variance swap agreements involve two parties agreeing to exchange cash flows based on the measured variance (or square of volatility) of a specified underlying asset. One party agrees to exchange a "fixed rate" or strike price payment for the "floating rate" or realized price variance on the underlying asset with respect to the notional amount. At inception, the strike price is generally chosen such that the fair value of the swap is zero. At the maturity date, a net cash flow is exchanged, where the payoff amount is equivalent to the difference between the realized price variance of the underlying asset and the strike price multiplied by the notional amount. As a receiver of the realized price variance, the Portfolio would receive the payoff amount when the realized price variance of the underlying asset is greater than the strike price and would owe the payoff amount when the realized price variance of the underlying asset is less than the strike price. As a payer of the realized price variance the Portfolio would owe the payoff amount

when the realized price variance of the underlying asset is greater than the strike price and would receive the payoff amount when the variance is less than the strike price.

The use of swap agreements involves investment techniques, risks, and transaction costs different from those associated with ordinary portfolio security transactions, including assumptions about market conditions, interest rates, and other applicable factors. As a result, the performance of the Portfolio will be different than if it had used ordinary portfolio security transactions. OTC swap agreements do not involve the delivery of securities and are subject to counterparty risk. If the other party to a swap agreement defaults and fails to consummate the transaction, the Portfolio's risk of loss will consist of the net amount of interest or other payments that the Portfolio is contractually entitled to receive. Therefore, the Portfolio would consider the creditworthiness of the counterparty to a swap agreement in evaluating potential credit risk.

Certain clearinghouses offer clearing for limited types of derivatives transactions, such as interest rate and credit default swap agreements. Centrally cleared swap agreements must be transacted through a futures commission merchant ("FCM") and cleared through a clearinghouse that serves as a central counterparty. The performance of a centrally cleared swap transaction is effectively guaranteed by a central clearinghouse, thereby reducing the Portfolio's exposure to the credit risk of its original counterparty. The Portfolio will be required to post specified levels of margin with the clearinghouse or at the instruction of the clearinghouse; the margin required by a clearinghouse may be greater than the margin the Portfolio would be required to post in an uncleared transaction. Centrally cleared swap agreements, if any, are reported on the Statement of assets and liabilities based on variation margin received or paid, if any.

Forward foreign currency contracts—Certain Portfolios may enter into forward foreign currency contracts as part of their investment objective, for purposes of risk management or to hedge the US dollar value of portfolio securities denominated in a particular currency. Generally, a forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Non-deliverable forward foreign currency contracts are settled with the counterparty in US dollars, or another fully convertible currency, without the physical delivery of foreign currency.

Fluctuations in the value of open forward foreign currency contracts are recorded daily for book purposes as unrealized appreciation or depreciation on forward foreign currency contracts by the Portfolios. Realized gains and losses on forward foreign currency contracts include net gains or losses recognized by the Portfolios on contracts which have been sold or matured.

Risks may arise upon entering into forward foreign currency contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the US dollar or each other.

Derivatives by underlying risk—Investment companies value their derivatives at fair value and recognize changes in fair value through the Statement of operations. Under US GAAP, investment companies do not qualify for hedge accounting. Accordingly, even though a Portfolio's investments in derivatives may represent economic hedges, they are considered to be non-hedge transactions for purposes of disclosure under US GAAP.

The volume of derivatives as disclosed in each Portfolio's portfolio of investments is representative of the volume of derivatives outstanding during the period ended January 31, 2024.

Swap agreements, forward foreign currency contracts, swaptions and options written entered into by the Portfolios may contain credit-risk related contingent features that could be triggered subject to certain circumstances. Such circumstances include agreed upon net asset value thresholds. If triggered, the derivative counterparty could request additional cash margin and/or terminate the derivative contract. The aggregate fair value of the derivative contracts

that are in a net liability position that contain these triggers can be found in the Portfolio's Portfolio of investments. The aggregate fair value of assets that are already posted as collateral as of January 31, 2024 is reflected in the Statement of assets and liabilities.

At January 31, 2024, the Portfolios had the following derivatives categorized by underlying risk:

edit risk	Equity risk	Takal salasa

The change in net unrealized appreciation (depreciation) of options and swaptions purchased is shown in the Statement of operations in change in net unrealized appreciation (depreciation) on investments.

Offsetting of certain derivatives—The Portfolios typically enter into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") or similar master agreements with its OTC derivative contract counterparties in order to, among other things, reduce their credit risk to counterparties. ISDA Master

Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Portfolios typically may offset with the counterparty certain derivative financial instrument's payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default or termination. The Statement of assets and liabilities is presented gross of any netting.

At January 31, 2024, derivative assets and liabilities (by type) on a gross basis and derivatives subject to an enforceable master netting arrangement ("MNA") or similar were as follows:

PACE Mortgage-Backed Securities Fixed Income Investments						
Derivative Financial Instruments:	Assets	Liabilities

¹ UBS Asset Management (Americas) LLC has the authority to allocate a portion of the Portfolio's assets to unaffiliated actively- and passively managed pooled investment vehicles and index futures.

At January 31, 2024, certain Portfolios owe, or are (owed by), UBS AM for investment management and administration fees, net of fee waivers/expense reimbursements and/or recoupments as follows:

	Amounts
	due to
	(owed by)
Portfolio	UBS AM
PACE Government Money Market Investments	\$299,916
PACE Mortgage-Backed Securities Fixed Income Investments	46,292
PACE Intermediate Fixed Income Investments	(10,455)
PACE Strategic Fixed Income Investments	161,506
PACE Municipal Fixed Income Investments	63,022
PACE Global Fixed Income Investments	59,471
PACE High Yield Investments	82,612
PACE Large Co Value Equity Investments	504,459
PACE Large Co Growth Equity Investments	532,123
PACE Small/Medium Co Value Equity Investments	219,286
PACE Small/Medium Co Growth Equity Investments	172,663
PACE International Equity Investments	498,514
PACE International Emerging Markets Equity Investments	212,603
PACE Global Real Estate Securities Investments	40,193
PACE Alternative Strategies Investments	298,575

PACE Alternative Strategies Investments and UBS AM have entered into a written fee waiver agreement pursuant to which UBS AM is voluntarily obligated to waive its management fees to the extent necessary to offset the cost savings to UBS AM for allocating a portion of the Portfolio's assets to other unaffiliated pooled investment vehicles and index futures. The fee waiver agreement may be terminated by the Portfolio's Board at any time and also will be terminated automatically upon the expiration or termination of the Portfolio's advisory contract with UBS AM. For the period ended January 31, 2024, UBS AM was contractually obligated to waive \$147,568 in investment management and administration fees. This management fee waiver will not be subject to future recoupment.

The UBS Government Money Market Investments Fund and UBS AM have also entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees through November 30, 2024 in an amount equal to 0.13% of the fund's average daily net assets. For the period ended January 31, 2024, UBS AM waived \$1,789,826 in investment management fees. This management fee waiver will not be subject to future recoupment.

For PACE High Yield Investments Class P2, PACE International Equity Investments Class P2, PACE International Emerging Markets Equity Investments Class P2, and PACE Alternative Strategies Investments Class P2, UBS AM has entered into a written agreement pursuant to which UBS AM has agreed to waive a portion of its investment management and administration fees. For the period ended January 31, 2024, the fees waived were \$16,211, \$52,563, \$230,186 and \$182,239, respectively. Such amounts are not subject to future recoupment.

UBS AM is contractually obligated to waive all or a portion of its investment management and administration fees and/or to reimburse the Portfolios for certain operating expenses in order to maintain the total annual ordinary operating expenses of each class (with certain exclusions such as dividend expense, borrowing costs and interest expense, relating to short sales, and expenses attributable to investment in other companies, interest, taxes, brokerage commissions and extraordinary expenses) through November 30, 2024 at a level not to exceed the amounts in the table below.

Each Portfolio will repay UBS AM for any such waived fees/reimbursed expenses during a three-year period following July 31, 2021, to the extent that ordinary operating expenses (with certain exclusions such as dividend expense, borrowing costs and interest expense) are otherwise below the applicable expense cap in effect at the time the fees or expenses were waived/reimbursed. For the period ended January 31, 2024, UBS AM had the following contractual fee waivers/expense reimbursements, and recoupments. The fee waivers/expense reimbursements, portions of which are subject to repayment by the Portfolios through July 31, 2027, and recoupments for the period ended January 31, 2024, were as follows:

	Class A expense	Class Y expense	Class P expense	Class P2 expense	Fee waivers/ expense

UBS AM may voluntarily undertake to waive fees and/or reimburse expenses in the event that the yields on UBS Government Money Market Investments Fund drop below a certain level. This undertaking is voluntary and not contractual and may be terminated at any time. For the period ended January 31, 2024, the UBS Government Money Market Investments Fund did not incur this additional waiver.

For the period ended January 31, 2024, the Portfolios listed below paid broker commissions to affiliates of the investment manager as detailed in the below table. These broker commissions are reflected in the Statement of assets and liabilities within cost of investments, and the Statement of operations within net realized gains (losses) from, and/or net change in unrealized appreciation/depreciation of investments and/or futures.

During the period ended, January 31, 2024, some of the Portfolios engaged in purchase and sale transactions where an affiliate was underwriter. In such cases, the affiliate underwriter was not compensated and each trade was approved by the board.

Shareholder services plans

UBS AM (US) is the principal underwriter of each Portfolio's shares. The Trust has adopted a shareholder services plan (the "Plan") with respect to each Portfolio (with the exception of UBS Government Money Market Investments Fund, which only offers Class P shares) pursuant to Rule 12b-1 under the 1940 Act for Class A shares. The Plan governs the payments made for the expenses incurred in the service of Class A shares. Annual fees under the Plan as a percentage of the average daily net assets of Class A shares of each applicable Portfolio are 0.25%.

UBS AM (US) also receives the proceeds of the initial sales charges paid upon purchase of Class A shares and the contingent deferred sales charges paid by shareholders upon certain redemptions of Class A. For the period ended January 31, 2024, there were no sales charges earned by UBS AM (US).

At January 31, 2024, certain Portfolios owed UBS AM (US) service fees.

	Service

PACE Alternative Strategies Investments—Class A	756

Transfer agency and related services fees

UBS Financial Services Inc. provides certain services to the Portfolios pursuant to a delegation of authority from BNY Mellon Investment Servicing (US) Inc. ("BNY Mellon"), the Portfolios' transfer agent, and is compensated for these services by BNY Mellon, not the Portfolios.

For the period ended January 31, 2024, UBS Financial Services Inc. received from BNY Mellon, not the Portfolios, total delegated services fees as follows:

	Delegated
	service
Portfolio	fees earned
PACE Mortgage-Backed Securities Fixed Income Investments	\$14,255
PACE Intermediate Fixed Income Investments	13,682
PACE Strategic Fixed Income Investments	17,373

PACE International Equity Investments	18,848
PACE International Emerging Markets Equity Investments	18,810
PACE Global Real Estate Securities Investments	13,402
PACE Alternative Strategies Investments	10,032

Securities lending

Each Portfolio may lend securities up to 33½% of its total assets to qualified broker-dealers or institutional investors. The loans are initially secured at all times by cash, US government securities and irrevocable letters of credit in an amount at least equal to 102% of the market value of the securities loaned with respect to domestic securities and 105% of the market value of the securities loaned with respect to foreign securities. In the event that the market value of the cash, US government securities, and irrevocable letters of credit securing the loan falls below 100% for domestic securities, and 103% for foreign securities, the borrower must provide additional cash, US government securities, and irrevocable letters of credit so that the total securing the loan is at least 102% of the market value for domestic securities and 105% of the market value for foreign securities.

Each Portfolio will regain ownership of loaned securities to exercise certain beneficial rights; however, each Portfolio may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower fail financially. Each Portfolio receives compensation for lending its securities from interest or dividends earned on the cash, US government securities and irrevocable letters of credit held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. Cash collateral received is invested in State Street Navigator Securities Lending Government Money Market Portfolio, which is included in each Portfolio of investments. State Street Bank and Trust Company serves as the Portfolios' lending agent.

In addition, PACE International Equity Investments and PACE Alternative Strategies Investments participate in State Street's enhanced custody program. Through this program, State Street is capable of facilitating the Portfolios' short selling activity at a lower cost. A portion of the cash collateral received in connection with the Portfolios' securities lending activity is pledged back to State Street for the financing of short sales. This amount is shown as cash collateral on investments sold short in the Statement of assets and liabilities.

At January 31, 2024, the following Portfolios had securities on loan at value, cash collateral and non-cash collateral as follows:

	Value of securities	Cash	Non-cash	Total	Security types
Portfolio	on loan	collateral	collateral*	collateral	held as non-cash collateral

^{*} These securities are held for the benefit of the Portfolio's custodian. The Portfolio cannot repledge or resell this collateral. As such, this collateral is excluded from the Statement of assets and liabilities.

The table below represents the disaggregation at January 31, 2024 of the gross amount of recognized liabilities for securities lending transactions. As the securities loaned are subject to termination by the Portfolios or the borrower at any time, the remaining contractual maturities of the transactions presented below are considered to be overnight and continuous.

Bank line of credit

With the exception of UBS Government Money Market Investments Fund, the Portfolios participate with other Portfolios managed, advised or subadvised by UBS AM in a \$185 million committed credit facility (the "Committed Credit Facility") with State Street Bank and Trust Company. The Committed Credit Facility is to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of a participating Portfolio at the request of shareholders and other temporary or emergency purposes.

Total gross

^{**} This Portfolio participates in the enhanced custody program which permits self-borrow transactions that does not require any collateral for the securities on loan under those transactions.

Interest on amounts borrowed is calculated based on the prevailing rates in effect at the time of borrowing. Each Portfolio covered by the Committed Credit Facility has agreed to pay commitment fees on the average daily balance of the Committed Credit Facility not utilized. Commitment fees have been allocated among the Portfolios in the Committed Credit Facility as follows: 50% of the allocation is based on the relative asset size of Portfolios and the other 50% of the allocation is based on utilization. For the period ended January 31, 2024, the following Portfolios had borrowings as follows:

Portfolio	Average daily amount of borrowing outstanding	Days outstanding	Interest expense	Weighted average annualized interest rate
PACE Large Co Value Equity Investments	\$ 195,783	13	\$ 472	6.680%
PACE Small/Medium Co Value Equity Investments	1,276,933	10	2,369	6.680

¹ For the period from November 11, 2022 (commencement of operations) through July 31, 2023.

Federal tax status

Each of the Portfolios intends to distribute substantially all of its income and to comply with the other requirements of the Internal Revenue Code applicable to regulated investment companies. Accordingly, no provision for federal income taxes is required. In addition, by distributing during each calendar year substantially all of its net investment income, net realized capital gains and certain other amounts, if any, each Portfolio intends not to be subject to a federal excise tax.

The tax character of distributions paid during the fiscal year ended July 31, 2023 was as follows:

Portfolio	Tax-exempt income	Ordinary income	Long term realized capital gains	Return of capital
UBS Government Money Market Investments Fund	\$ —	\$65,060,792	\$ —	\$ —

PACE Small/Medium Co Growth Equity Investments	937,574		_			

ASC 740-10 "Income Taxes—Overall" sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken. The Portfolios have conducted an analysis and concluded as of January 31, 2024, there are no significant uncertain tax positions taken or expected to be taken that would require recognition in the financial statements. It is each Portfolio's policy to record any significant foreign tax exposures in the financial statements. The Portfolios recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of operations. During the six months ended January 31, 2024, the Portfolios did not incur any interest or penalties. Capital gains realized by the Portfolios on securities issued in or by certain foreign countries may be subject to capital gains tax imposed by those countries.

Under the applicable foreign tax laws, gains on certain securities held in certain foreign countries may be subject to taxes will be paid by the Portfolios.

Each of the tax years in the four year period ended July 31, 2023 remains subject to examination by the Internal Revenue Service and state taxing authorities.

PACE Select Advisors Trust General information (unaudited)

Monthly and quarterly portfolio holdings disclosure

The Portfolios, except UBS Government Money Market Investments Fund, file their complete schedules of portfolio holdings with the US Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year as an exhibit to their reports on Form N-PORT. The Form N-PORT reports are available on the SEC's Web site at http://www.sec.gov. Additionally, you may obtain copies of Form N-PORT for the first and third quarters of each fiscal year from the Funds upon request by calling 1-800-647 1568.

UBS Government Money Market Investments Fund files its complete schedule of portfolio holdings with the SEC each month on Form N-MFP. These reports on Form N-MFP are available on the SEC's Web site at http://www.sec.gov. The Fund makes portfolio holdings information available to shareholders on UBS's Web site at the following internet address: www.ubs.com/usmoneymarketfunds. Investors also may find additional information about the Fund at the above referenced UBS Web site internet address.

Proxy voting policies, procedures and record

You may obtain a description of each Portfolio's (1) proxy voting policies, (2) proxy voting procedures and (3) information regarding how a Portfolio voted any proxies related to portfolio securities during the most recent 12-month period ended June 30 for which an SEC filing has been made, without charge, upon request by contacting a Portfolio directly at 1-800-647 1568, online on a Portfolio's Web site: www.ubs.com/ubsam-proxy, or on the EDGAR Database on the SEC's Web site (http://www.sec.gov).

PACE Select Advisors Trust—PACE Small/Medium Co Value Equity Investments

ARGA Investment Management, LP

Background—At a meeting of the board of PACE Select Advisors Trust (the "Trust") on September 27, 2023, the members of the board, including the trustees who are not "interested persons," as defined in the Investment Company Act of 1940, as amended, of the Trust (the "Independent Trustees"), considered and approved the proposed sub-advisory agreement (the "Sub-Advisory Agreement") between UBS Asset Management (Americas) Inc. ("UBS AM") and ARGA Investment Management, LP ("ARGA") with respect to PACE Small/Medium Co Value Equity Investments (the "Portfolio"). Management discussed with the board its proposal to terminate one current sub-advisor to reallocate the portion of the assets managed by an existing sub-advisor to ARGA and to appoint ARGA as a sub-advisor to the Portfolio. In considering the approval of the Sub-Advisory Agreement, the board was able to draw on its knowledge of the Trust, its portfolios and UBS AM. The board recognized its familiarity with UBS AM and the investment management and sub-advisory agreements for this and the other portfolios of the Trust, including the extensive materials the board had previously reviewed in connection with the annual reconsideration of the contracts for the portfolios. The board also received a memorandum from UBS AM discussing UBS AM's reasons for recommending ARGA as a sub-advisor to the Portfolio.

In its consideration of the approval of the Sub-Advisory Agreement, the board considered the following factors:

Nature, extent and quality of the services under the Sub-Advisory Agreement—The board's evaluation of the services to be provided by ARGA to the Portfolio took into account the board's knowledge and familiarity gained as board members of funds in the UBS New York fund complex, including the Trust and its portfolios. It reviewed the purposes and investment objective of the Portfolio and UBS AM's overall plan to meet the Portfolio's stated purposes and objective. The board considered management's reasons for recommending the appointment of ARGA as a sub-advisor to the Portfolio, including its "due diligence" concerning ARGA and its belief that adding ARGA's strategy would provide an opportunity to increase the Portfolio's return potential. The board also received materials from ARGA detailing its investment philosophy and spoke with representatives of ARGA, who discussed with the board that investment philosophy and process and the backgrounds and qualifications of the portfolio management team. The board took into account its familiarity with ARGA as a sub-advisor to PACE International Emerging Markets Equity Investments, a different series of the Trust. The board concluded that, overall, it was satisfied with the nature, extent and quality of services expected to be provided to the Portfolio under the proposed Sub-Advisory Agreement.

Sub-advisory fee—The board reviewed and considered the proposed contractual sub-advisory fee to be payable by UBS AM to ARGA in light of the nature, extent and quality of the sub-advisory services anticipated to be provided by ARGA. The board noted that the proposed contractual sub-advisory fee, along with the other sub-advisory changes proposed by UBS AM, would result in a net decrease in the annualized sub-advisory fees paid by UBS AM with respect to the Portfolio. The board determined that the proposed sub-advisory fee was reasonable in light of the nature, extent and quality of the services proposed to be provided to the Portfolio under the Sub-Advisory Agreement.

Fund performance—The board received and considered performance information for the strategy provided by ARGA. The board also noted that, as ARGA would be a new sub-advisor to the Portfolio, the current performance of the Portfolio was not a significant factor in the consideration of the approval of the Sub-Advisory Agreement.

Advisor profitability—Profitability of ARGA or its affiliates or UBS AM or its affiliates in providing services to the Portfolio was not a significant factor considered by the board, as the sub-advisory fee would be paid by UBS AM out of the management fee paid to it by the Portfolio, and not by the Portfolio.

Economies of scale—The board noted that, as the sub-advisory fee for the Portfolio would be paid by UBS AM, not by the Portfolio, consideration of economies of scale with respect specifically to the sub-advisory fee was not relevant.

Other benefits to ARGA—The board was informed by management that ARGA's relationship with the Portfolio would be limited to its provision of sub-advisory services to the Portfolio and that therefore management believed that ARGA would not receive tangible ancillary benefits as a result of its relationship with the Portfolio, with the exception of possible benefits from soft dollars (e.g., research credits related to transaction commissions) for the Portfolio (which would also potentially benefit the Portfolio). The board recognized that ARGA could receive intangible benefits from its association with the Portfolio, such as increased name recognition or publicity from being selected as a sub-advisor to the Portfolio after an extensive review process. Similarly, the Portfolio could benefit from having a sub-advisor with an established or well-regarded reputation.

In light of all of the foregoing, the board, including a majority of the Independent Trustees, approved the proposed Sub-Advisory Agreement for the Portfolio. No single factor reviewed by the board was identified by the board as the principal factor in determining whether to approve the Sub-Advisory Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.

PACE Select Advisors Trust—PACE Small/Medium Co Value Equity Investments

Victory Capital Management Inc., acting through its business unit branded as Integrity Asset Management

Background—At a meeting of the board of PACE Select Advisors Trust (the "Trust") on September 27, 2023, the members of the board, including the trustees who are not "interested persons," as defined in the Investment Company Act of 1940, as amended, of the Trust (the "Independent Trustees"), considered and approved the proposed sub-advisory agreement (the "Sub-Advisory Agreement") between UBS Asset Management (Americas) Inc. ("UBS AM") and Victory Capital Management Inc., acting through its business unit branded as Integrity Asset Management ("Integrity") with respect to PACE Small/Medium Co Value Equity Investments (the "Portfolio"). Management discussed with the board its proposal to reduce the target allocation of the Portfolio's assets managed by an existing sub-advisor and to reallocate the resulting difference to Integrity and to appoint Integrity as a sub-advisor to the Portfolio. In considering the approval of the Sub-Advisory Agreement, the board was able to draw on its knowledge of the Trust, its portfolios and UBS AM. The board recognized its familiarity with UBS AM and the investment management and sub-advisory agreements for this and the other portfolios of the Trust, including the extensive materials the board had previously reviewed in connection with the annual reconsideration of the contracts for the portfolios. The board also received a memorandum from UBS AM discussing UBS AM's reasons for recommending Integrity as a sub-advisor to the Portfolio.

In its consideration of the approval of the Sub-Advisory Agreement, the board considered the following factors:

Nature, extent and quality of the services under the Sub-Advisory Agreement—The board's evaluation of the services to be provided by Integrity to the Portfolio took into account the board's knowledge and familiarity gained as board members of funds in the UBS New York fund complex, including the Trust and its portfolios. It reviewed the purposes and investment objective of the Portfolio and UBS AM's overall plan to meet the Portfolio's stated purposes and objective. The board considered management's reasons for recommending the appointment of Integrity as a sub-advisor to the Portfolio, including its "due diligence" concerning Integrity and its belief that adding Integrity's strategy would provide an opportunity to increase the Portfolio's return potential. The board also received materials from Integrity detailing its investment philosophy and spoke with representatives of Integrity, who discussed with the board that investment philosophy and process and the backgrounds and qualifications of the portfolio management team. The board concluded that, overall, it was satisfied with the nature, extent and quality of services expected to be provided to the Portfolio under the proposed Sub-Advisory Agreement.

Sub-advisory fee—The board reviewed and considered the proposed contractual sub-advisory fee to be payable by UBS AM to Integrity in light of the nature, extent and quality of the sub-advisory services anticipated to be provided by Integrity. The board noted that the proposed contractual sub-advisory fee, along with the other sub-advisory changes proposed by UBS AM, would result in a net decrease in the annualized sub-advisory fees paid by UBS AM with respect to the Portfolio. The board determined that the proposed sub-advisory fee was reasonable in light of the nature, extent and quality of the services proposed to be provided to the Portfolio under the Sub-Advisory Agreement.

Fund performance—The board received and considered performance information for the strategy provided by Integrity. The board also noted that, as Integrity would be a new sub-advisor to the Portfolio, the current performance of the Portfolio was not a significant factor in the consideration of the approval of the Sub-Advisory Agreement.

Advisor profitability—Profitability of Integrity or its affiliates or UBS AM or its affiliates in providing services to the Portfolio was not a significant factor considered by the board, as the sub-advisory fee would be paid by UBS AM out of the management fee paid to it by the Portfolio, and not by the Portfolio.

Economies of scale—The board noted that, as the sub-advisory fee for the Portfolio would be paid by UBS AM, not by the Portfolio, consideration of economies of scale with respect specifically to the sub-advisory fee was not relevant.

Other benefits to Integrity—The board was informed by management that Integrity's relationship with the Portfolio would be limited to its provision of sub-advisory services to the Portfolio and that therefore management believed that Integrity would not receive tangible ancillary benefits as a result of its relationship with the Portfolio, with the exception of possible benefits from soft dollars (e.g., research credits related to transaction commissions) for the Portfolio (which would also potentially benefit the Portfolio). The board recognized that Integrity could receive intangible benefits from its association with the Portfolio, such as increased name recognition or publicity from being selected as a sub-advisor to the Portfolio after an extensive review process. Similarly, the Portfolio could benefit from having a sub-advisor with an established or well-regarded reputation.

In light of all of the foregoing, the board, including a majority of the Independent Trustees, approved the proposed Sub-Advisory Agreement for the Portfolio. No single factor reviewed by the board was identified by the board as the principal factor in determining whether to approve the Sub-Advisory Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.

PACE Select Advisors Trust—PACE International Equity Investments

Los Angeles Capital Management LLC ("Los Angeles Capital")

Background—At a meeting of the board of PACE Select Advisors Trust (the "Trust") on September 27, 2023, the members of the board, including the trustees who are not "interested persons" of the Trust (the "Independent Trustees") as defined in the Investment Company Act of 1940, as amended, considered and approved the proposed sub-advisory agreement between UBS Asset Management (Americas) Inc. ("UBS AM") and Los Angeles Capital (the "Sub-Advisory Agreement") with respect to PACE International Equity Investments (the "Portfolio"). Management advised that, as part of Los Angeles Capital's succession planning, it will change its employee equity ownership sufficiently to result in a regulatory change of control (the "Transaction") and, thus, a termination of the current subadvisory agreement between UBS AM and Los Angeles Capital with respect to the Portfolio (the "Current Sub-Advisory Agreement") upon consummation of the Transaction. Management noted that if approved, the proposed Sub-Advisory Agreement would become effective upon consummation of the Transaction. Management stated that the proposed Sub-Advisory Agreement has substantially the same terms as the Current Sub-Advisory Agreement, including the fee rates payable thereunder. The board recognized its familiarity with UBS AM and the investment management and sub-advisory agreements for this and the other portfolios of the Trust, including the extensive materials the board had previously reviewed in connection with the annual reconsideration of the contracts for the portfolios. The board also received a memorandum from UBS AM discussing UBS AM's reasons for recommending that Los Angeles Capital continue to serve as a sub-advisor to the Portfolio.

In its consideration of the approval of the Sub-Advisory Agreement, the board considered the following factors:

Nature, extent and quality of the services under the Sub-Advisory Agreement—The board's evaluation of the services to be provided by Los Angeles Capital to the Portfolio took into account the board's knowledge and familiarity gained as board members of funds in the UBS New York fund complex, including the Trust and its portfolios. The board considered management's reasons for recommending that Los Angeles Capital continue to serve as a sub-advisor to the Portfolio, including that there were no expected material changes with respect to the current investment team or its management of the Portfolio as a result of the Transaction. In considering the approval of the Sub-Advisory Agreement, the board was able to draw on its knowledge of the Trust, its portfolios and UBS AM. The board was also able to draw on its knowledge of the current investment team members, including materials it previously received from, and meetings it previously held with, representatives of Los Angeles Capital who discussed with the board the investment philosophy and the backgrounds and qualifications of the investment team. The board concluded that, overall, it was satisfied with the nature, extent and quality of services expected to be provided to the Portfolio under the Sub-Advisory Agreement.

Sub-advisory fee—The board reviewed and considered the proposed contractual sub-advisory fee to be payable by UBS AM to Los Angeles Capital in light of the nature, extent and quality of the sub-advisory services anticipated to be provided by Los Angeles Capital. The board noted that the sub-advisory fee rate in the Sub-Advisory Agreement was the same as that in the Current Sub-Advisory Agreement. The board determined that the proposed sub-advisory fee was reasonable in light of the nature, extent and quality of the services proposed to be provided to the Portfolio under the Sub-Advisory Agreement.

Fund performance—The board noted that it previously received and considered performance information provided by UBS AM, including relative performance information from independent providers of investment company data. The board also noted that UBS AM believes that the Portfolio's investment team would continue to perform at the same level as it did prior to the Transaction. The board concluded that, overall, it was satisfied with the performance of the Portfolio.

Advisor profitability—Profitability of Los Angeles Capital or its affiliates or UBS AM or its affiliates in providing services to the Portfolio was not a significant factor considered by the board, as the sub-advisory fee would be paid

by UBS AM out of the management fee paid to it by the Portfolio, and not by the Portfolio. As noted above, the board observed that the contractual sub-advisory fee paid by UBS AM to Los Angeles Capital would be the same as the fee that was paid by UBS AM under the Current Sub-Advisory Agreement.

Economies of scale—The board noted that, as the sub-advisory fee for the Portfolio would be paid by UBS AM, not by the Portfolio, consideration of economies of scale with respect specifically to the sub-advisory fee was not relevant.

Other benefits to Los Angeles Capital—The board was informed by management that Los Angeles Capital's relationship with the Portfolio would continue to be limited to its provision of sub-advisory services to the Portfolio and that therefore management believed that Los Angeles Capital would not receive tangible ancillary benefits as a result of its relationship with the Portfolio, with the exception of possible benefits from soft dollars (e.g., research credits related to transaction commissions) for the Portfolio (which would also potentially benefit the Portfolio). The board recognized that Los Angeles Capital could receive intangible benefits from its association with the Portfolio, such as increased name recognition or publicity from being selected as a sub-advisor to the Portfolio after an extensive review process. Similarly, the Portfolio could benefit from having a sub-advisor with an established or well-regarded reputation.

In light of all of the foregoing, the board, including a majority of the Independent Trustees, approved the proposed Sub-Advisory Agreement for the Portfolio. No single factor reviewed by the board was identified by the board as the principal factor in determining whether to approve the Sub-Advisory Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.

November 2023 Board Meeting

PACE Select Advisors Trust—PACE High Yield Investments

Nomura Corporate Research and Asset Management Inc. ("NCRAM") Nomura Asset Management Singapore Limited ("NAM Singapore")

Background—At a meeting of the board of PACE Select Advisors Trust (the "Trust") on November 29, 2023, the members of the board, including the trustees who are not "interested persons" of the Trust (the "Independent Trustees") as defined in the Investment Company Act of 1940, as amended, considered and (i) ratified the termination of the sub-management agreement (the "Sub-Management Agreement") (the "Termination") between NCRAM and NAM Singapore with respect to PACE High Yield Investments (the "Portfolio"); and (ii) approved an amendment to the existing sub-advisory agreement ("Current Sub-Advisory Agreement") between UBS Asset Management (Americas) Inc. ("UBS AM") and NCRAM (the "Amended Sub-Advisory Agreement") (the "Amendment", and together with the Termination, the "Arrangements") with respect to the Portfolio.

Management explained that NCRAM effectuated the Termination after implementing a new internal organizational structure with respect to NCRAM where NAM Singapore would no longer provide investment advisory services. Management noted that following the Termination, NCRAM will continue to manage NCRAM's allocated portion of the Portfolio's assets, and NAM Singapore will no longer provide any investment recommendations or any type of investment advice for the Portfolio. Instead, NCRAM has: (i) separately entered into a research agreement with NAM Singapore to provide general research services and support to NCRAM, which NCRAM may use for the benefit of the Portfolio; and (ii) entered into a "participating affiliate" arrangement which uses "associated persons" employed by an affiliate of NCRAM in NCRAM's provision of investment advisory services to the Portfolio.

Management explained that the Current Sub-Advisory Agreement provides that NCRAM is authorized to delegate all or a portion of its investment advisory services to the Portfolio to NAM Singapore pursuant to the terms of the Sub-Management Agreement. Management noted that the Amended Sub-Advisory Agreement would remove this term and all references to NAM Singapore and the delegation to NAM Singapore pursuant to the Sub-Management Agreement from the Amended Sub-Advisory Agreement.

Management stated that the Amended Sub-Advisory Agreement has substantially the same terms as the Current Sub-Advisory Agreement, including the fee rates payable thereunder. The board recognized its familiarity with UBS AM and the investment management and sub-advisory agreements for this and the other portfolios of the Trust, including the extensive materials the board had previously reviewed in connection with the annual reconsideration of the contracts for the portfolios.

In its consideration of the Arrangements, the board considered the following factors:

Nature, extent and quality of the services—The board's evaluation of the services to be provided by NCRAM to the Portfolio took into account the board's knowledge and familiarity gained as board members of funds in the UBS New York fund complex, including the Trust and its portfolios. The board considered management's reasons for recommending that NCRAM continue to serve as a sub-advisor to the Portfolio, including that there were no expected material changes with respect to the current investment team or its management of the Portfolio as a result of the Arrangements. In considering the approval of the Amended Sub-Advisory Agreement, the board was able to draw on its knowledge of the Trust, its portfolios and UBS AM. The board was also able to draw on its knowledge of the current investment team members, including materials it previously received from, and meetings it previously held with, representatives of NCRAM who discussed with the board the investment philosophy and the backgrounds and qualifications of the investment team. The board concluded that, overall, it was satisfied with the nature, extent and quality of services expected to be provided to the Portfolio under the Amended Sub-Advisory Agreement.

Sub-advisory fee—The board reviewed and considered the proposed contractual sub-advisory fee to be payable by UBS AM to NCRAM in light of the nature, extent and quality of the sub-advisory services anticipated to be provided by NCRAM. The board noted that the sub-advisory fee rate in the Amended Sub-Advisory Agreement was the same as that in the Current Sub-Advisory Agreement. The board determined that the proposed sub-advisory fee was reasonable in light of the nature, extent and quality of the services proposed to be provided to the Portfolio under the Amended Sub-Advisory Agreement.

Fund performance—The board noted that it previously received and considered performance information provided by UBS AM, including relative performance information from independent providers of investment company data. The board also noted that UBS AM believes that the Portfolio's investment team would continue to perform at the same level as it did prior to the effectiveness of the Arrangements. The board concluded that, overall, it was satisfied with the performance of the Portfolio.

Advisor profitability—Profitability of NCRAM or its affiliates or UBS AM or its affiliates in providing services to the Portfolio was not a significant factor considered by the board, as the sub-advisory fee would be paid by UBS AM out of the management fee paid to it by the Portfolio, and not by the Portfolio. As noted above, the board observed that the contractual sub-advisory fee paid by UBS AM to NCRAM would be the same as the fee that was paid by UBS AM under the Current Sub-Advisory Agreement.

Economies of scale—The board noted that, as the sub-advisory fee for the Portfolio would be paid by UBS AM, not by the Portfolio, consideration of economies of scale with respect specifically to the sub-advisory fee was not relevant.

Other benefits to NCRAM—The board was informed by management that NCRAM's relationship with the Portfolio would continue to be limited to its provision of sub-advisory services to the Portfolio and that therefore management believed that NCRAM would not receive tangible ancillary benefits as a result of its relationship with the Portfolio, with the exception of possible benefits from soft dollars (e.g., research credits related to transaction commissions) for the Portfolio (which would also potentially benefit the Portfolio). The board recognized that NCRAM could receive intangible benefits from its association with the Portfolio, such as increased name recognition or publicity from being selected as a sub-advisor to the Portfolio after an extensive review process. Similarly, the Portfolio could benefit from having a sub-advisor with an established or well-regarded reputation.

In light of all of the foregoing, the board, including a majority of the Independent Trustees, ratified and approved the Arrangements with respect to the Portfolio. No single factor reviewed by the board was identified by the board as the principal factor in determining whether to ratify or approve the Arrangements. The Independent Trustees were advised by separate independent legal counsel throughout the process.

PACE Select Advisors Trust—PACE Small/Medium Co Growth Equity Investments

Riverbridge Partners, LLC ("Riverbridge")

Background—At a meeting of the board of PACE Select Advisors Trust (the "Trust") on November 29, 2023, the members of the board, including the trustees who are not "interested persons" of the Trust (the "Independent Trustees") as defined in the Investment Company Act of 1940, as amended, considered and approved the proposed sub-advisory agreement between UBS Asset Management (Americas) Inc. ("UBS AM") and Riverbridge (the "Sub-Advisory Agreement") with respect to PACE Small/Medium Co Growth Equity Investments (the "Portfolio"). Management explained that Riverbridge had announced an agreement with Northill Capital Group ("Northill") to acquire Northill's interests in Riverbridge (the "Transaction"). Management noted that following the Transaction, Riverbridge principals will increase their ownership of the company's equity sufficiently to constitute a change in control for regulatory purposes. Management further explained that this change in control would cause the automatic termination of the current sub-advisory agreement between UBS AM and Riverbridge with respect to the Portfolio (the "Current Sub-Advisory Agreement") upon consummation of the Transaction. Management noted that if approved, the proposed Sub-Advisory Agreement would become effective upon consummation of the Transaction. Management stated that the proposed Sub-Advisory Agreement has substantially the same terms as the Current Sub-Advisory Agreement, including the fee rates payable thereunder. The board recognized its familiarity with UBS AM and the investment management and sub-advisory agreements for this and the other portfolios of the Trust, including the extensive materials the board had previously reviewed in connection with the annual reconsideration of the contracts for the portfolios. The board also received a memorandum from UBS AM discussing UBS AM's reasons for recommending that Riverbridge continue to serve as a sub-advisor to the Portfolio.

In its consideration of the approval of the Sub-Advisory Agreement, the board considered the following factors:

Nature, extent and quality of the services under the Sub-Advisory Agreement—The board's evaluation of the services to be provided by Riverbridge to the Portfolio took into account the board's knowledge and familiarity gained as board members of funds in the UBS New York fund complex, including the Trust and its portfolios. The board considered management's reasons for recommending that Riverbridge continue to serve as a sub-advisor to the Portfolio, including that there were no expected material changes with respect to the current investment team or its management of the Portfolio as a result of the Transaction. In considering the approval of the Sub-Advisory Agreement, the board was able to draw on its knowledge of the Trust, its portfolios and UBS AM. The board was also able to draw on its knowledge of the current investment team members, including materials it previously received from, and meetings it previously held with, representatives of Riverbridge who discussed with the board the investment philosophy and the backgrounds and qualifications of the investment team. The board concluded that, overall, it was satisfied with the nature, extent and quality of services expected to be provided to the Portfolio under the Sub-Advisory Agreement.

Sub-advisory fee—The board reviewed and considered the proposed contractual sub-advisory fee to be payable by UBS AM to Riverbridge in light of the nature, extent and quality of the sub-advisory services anticipated to be provided by Riverbridge. The board noted that the sub-advisory fee rate in the Sub-Advisory Agreement was the same as that in the Current Sub-Advisory Agreement. The board determined that the proposed sub-advisory fee was reasonable in light of the nature, extent and quality of the services proposed to be provided to the Portfolio under the Sub-Advisory Agreement.

Fund performance—The board noted that it previously received and considered performance information provided by UBS AM, including relative performance information from independent providers of investment company data. The board also noted that UBS AM believes that the Portfolio's investment team would continue to perform at the same level as it did prior to the Transaction. The board concluded that, overall, it was satisfied with the performance of the Portfolio.

Advisor profitability—Profitability of Riverbridge or its affiliates or UBS AM or its affiliates in providing services to the Portfolio was not a significant factor considered by the board, as the sub-advisory fee would be paid by UBS AM out of the management fee paid to it by the Portfolio, and not by the Portfolio. As noted above, the board observed that the contractual sub-advisory fee paid by UBS AM to Riverbridge would be the same as the fee that was paid by UBS AM under the Current Sub-Advisory Agreement.

Economies of scale—The board noted that, as the sub-advisory fee for the Portfolio would be paid by UBS AM, not by the Portfolio, consideration of economies of scale with respect specifically to the sub-advisory fee was not relevant.

Other benefits to Riverbridge—The board was informed by management that Riverbridge's relationship with the Portfolio would continue to be limited to its provision of sub-advisory services to the Portfolio and that therefore management believed that Riverbridge would not receive tangible ancillary benefits as a result of its relationship with the Portfolio, with the exception of possible benefits from soft dollars (e.g., research credits related to transaction commissions) for the Portfolio (which would also potentially benefit the Portfolio). The board recognized that Riverbridge could receive intangible benefits from its association with the Portfolio, such as increased name recognition or publicity from being selected as a sub-advisor to the Portfolio after an extensive review process. Similarly, the Portfolio could benefit from having a sub-advisor with an established or well-regarded reputation.

In light of all of the foregoing, the board, including a majority of the Independent Trustees, approved the proposed Sub-Advisory Agreement for the Portfolio. No single factor reviewed by the board was identified by the board as the principal factor in determining whether to approve the Sub-Advisory Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.

PACE Select Advisors Trust—PACE International Emerging Markets Equity Investments

William Blair Investment Management, LLC

At a meeting of the board of PACE Select Advisors Trust (the "Trust") on November 29, 2023, the members of the board, including the trustees who are not "interested persons" of the Trust (the "Independent Trustees") as defined in the Investment Company Act of 1940, as amended, considered the approval of an amendment of the sub-advisory agreement between UBS Asset Management (Americas) Inc. ("UBS AM") and William Blair Investment Management, LLC ("William Blair") (the "Sub-Advisory Agreement") with respect to a series of the Trust, PACE International Emerging Markets Equity Investments (the "Fund"). Management discussed with the board its proposal to lower the rate of the sub-advisory fee payable by UBS AM to William Blair by introducing additional breakpoints within the fee calculation, which would be effective as of December 1, 2023. Since the board had approved the renewal of the Sub-Advisory Agreement at a meeting held on July 18-19, 2023 (the "July Meeting"), and, other than as discussed below, there had been no material changes in the information presented, the board addressed certain of the relevant considerations, including consideration of the nature, extent and quality of the services under the Sub-Advisory Agreement, fund performance, economies of scale and other benefits that William Blair could receive from its association with the Fund, by reference to their considerations and determinations at the July Meeting. The board also received a memorandum discussing the proposed amendment to the Sub-Advisory Agreement.

UBS AM represented that there was expected to be no diminution in the nature, extent or quality of the services provided to the Fund by UBS AM or William Blair. The board reviewed and considered the proposed contractual sub-advisory fee to be payable by UBS AM to William Blair in light of the nature, extent and quality of the sub-advisory services provided by William Blair. The board noted that the proposed contractual sub-advisory fee would reduce the overall fee rate payable and result in a lower sub-advisory fee to be paid by UBS AM out of the management fee paid to it by the Fund as the Fund's assets grow. The board indicated that it would further consider the implications, if any, of this lower sub-advisory expense to UBS AM, among other matters, when it engages in its next full UBS AM management contract review, or before if appropriate. In this regard, it was noted that UBS AM provides updated profitability data on the Fund on an ongoing quarterly basis, which provides the board with other opportunities to monitor the impact of the proposed changes on profitability going forward.

The board, including a majority of the Independent Trustees, approved the amendment of the Sub-Advisory Agreement for the Fund. No single factor considered by the board was identified by the board as the principal factor in determining whether to approve amendment of the Sub-Advisory Agreement. The Independent Trustees were advised by separate independent legal counsel throughout the process.
